## 1 PERSONAL PROFILE

Creating gives me so much confidence and excitement and later I decided to achieve my education in

interior designing as forms, shapes, color, etc always fascinated me. I choose to get an international

exposure learning about new cultures and places moreover how design preferences place to places.

I am also an active traveler and visiting new resorts and restaurants have become a part of my lifestyle.

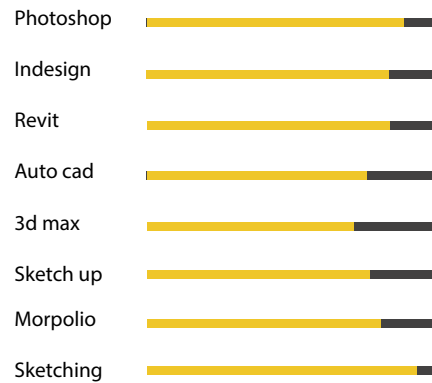

I have the passion to learn more about hospitality and the retail design world and plan to focus on

putting my theoretical knowledge into physical projects to facilitate the community and design some memorable work.
