

aurora

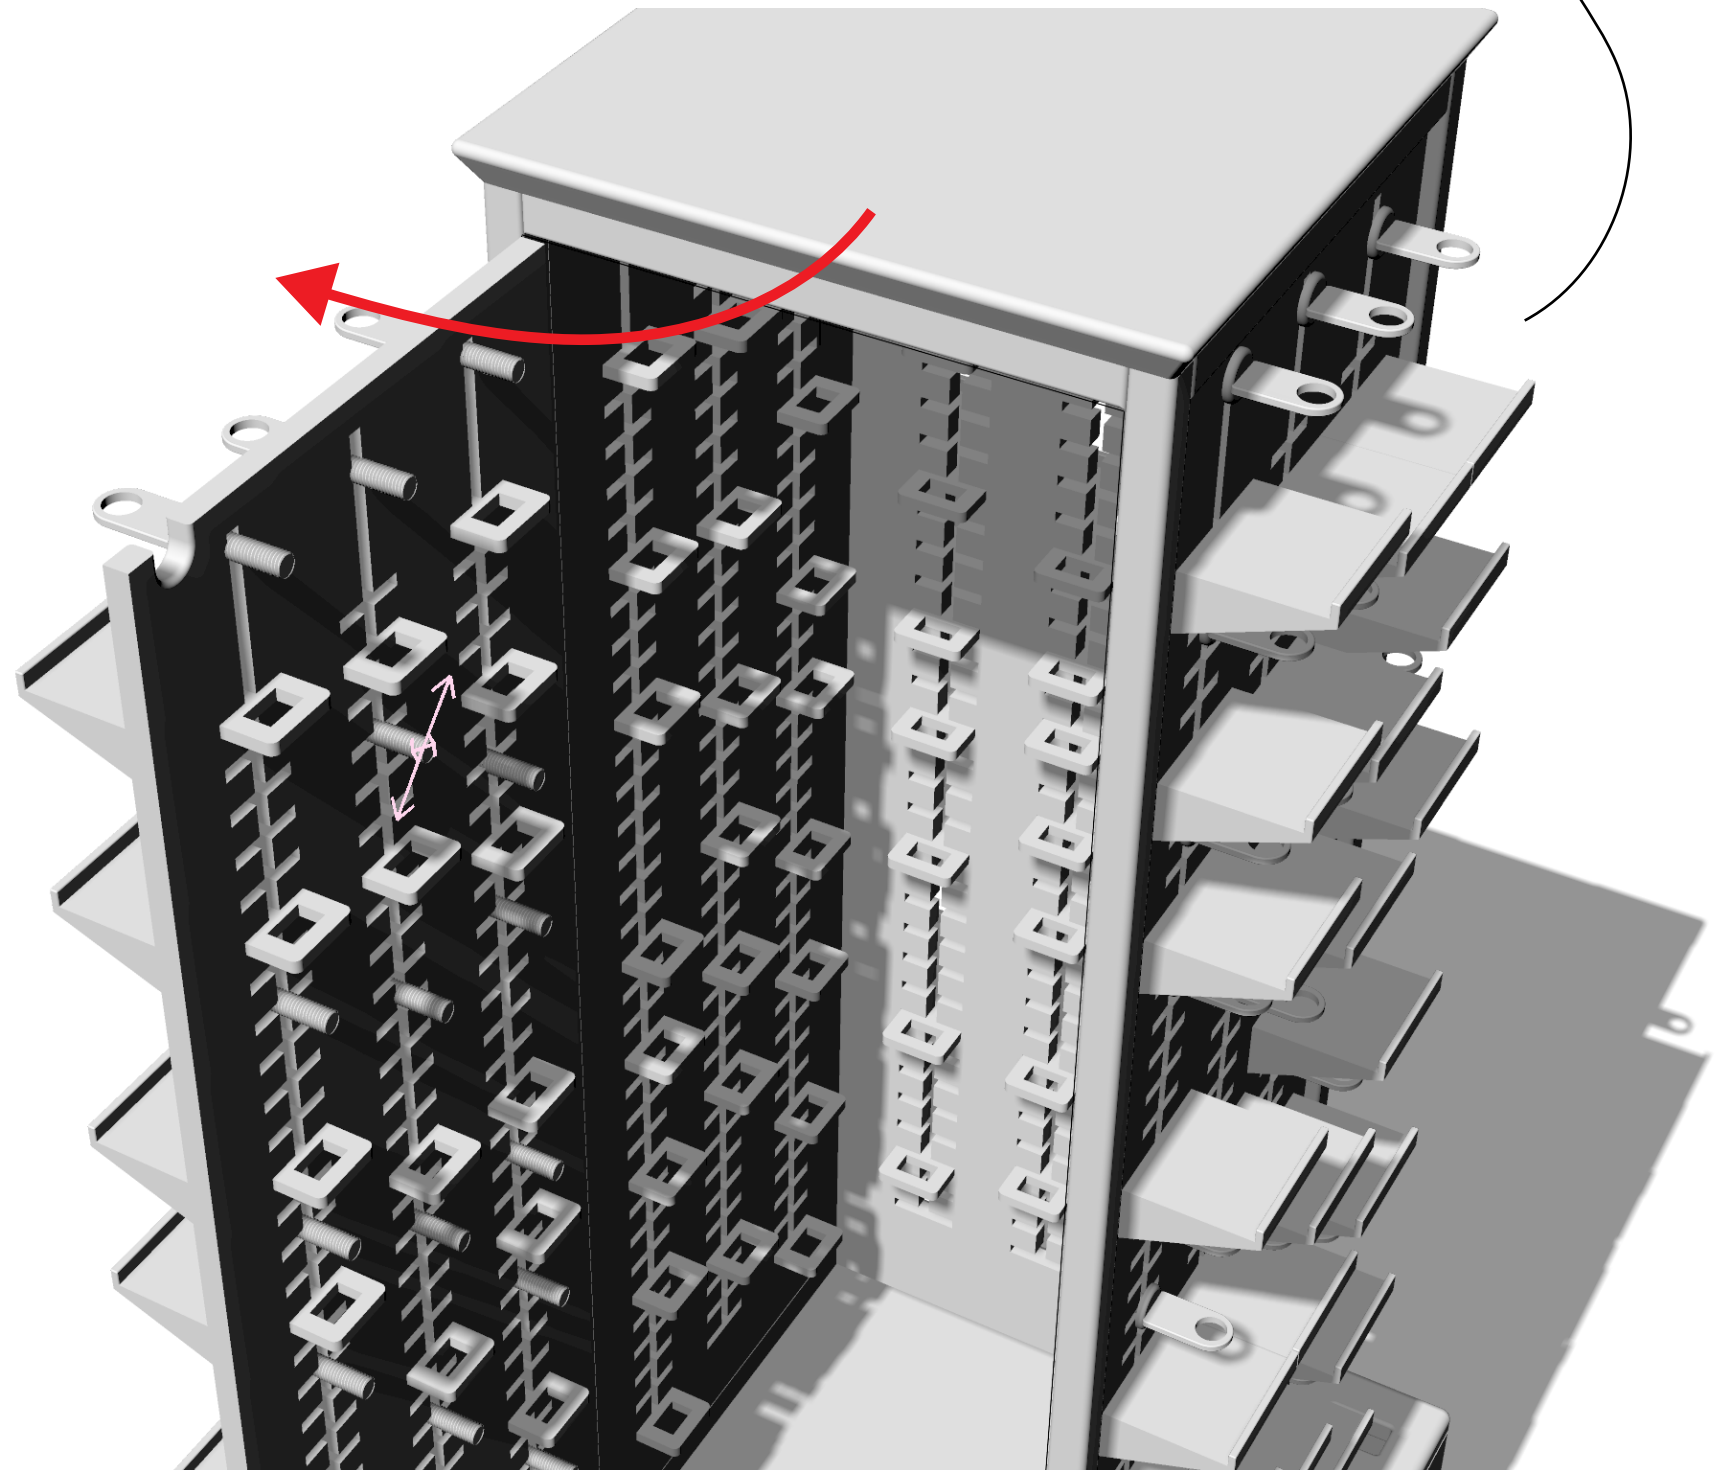

1

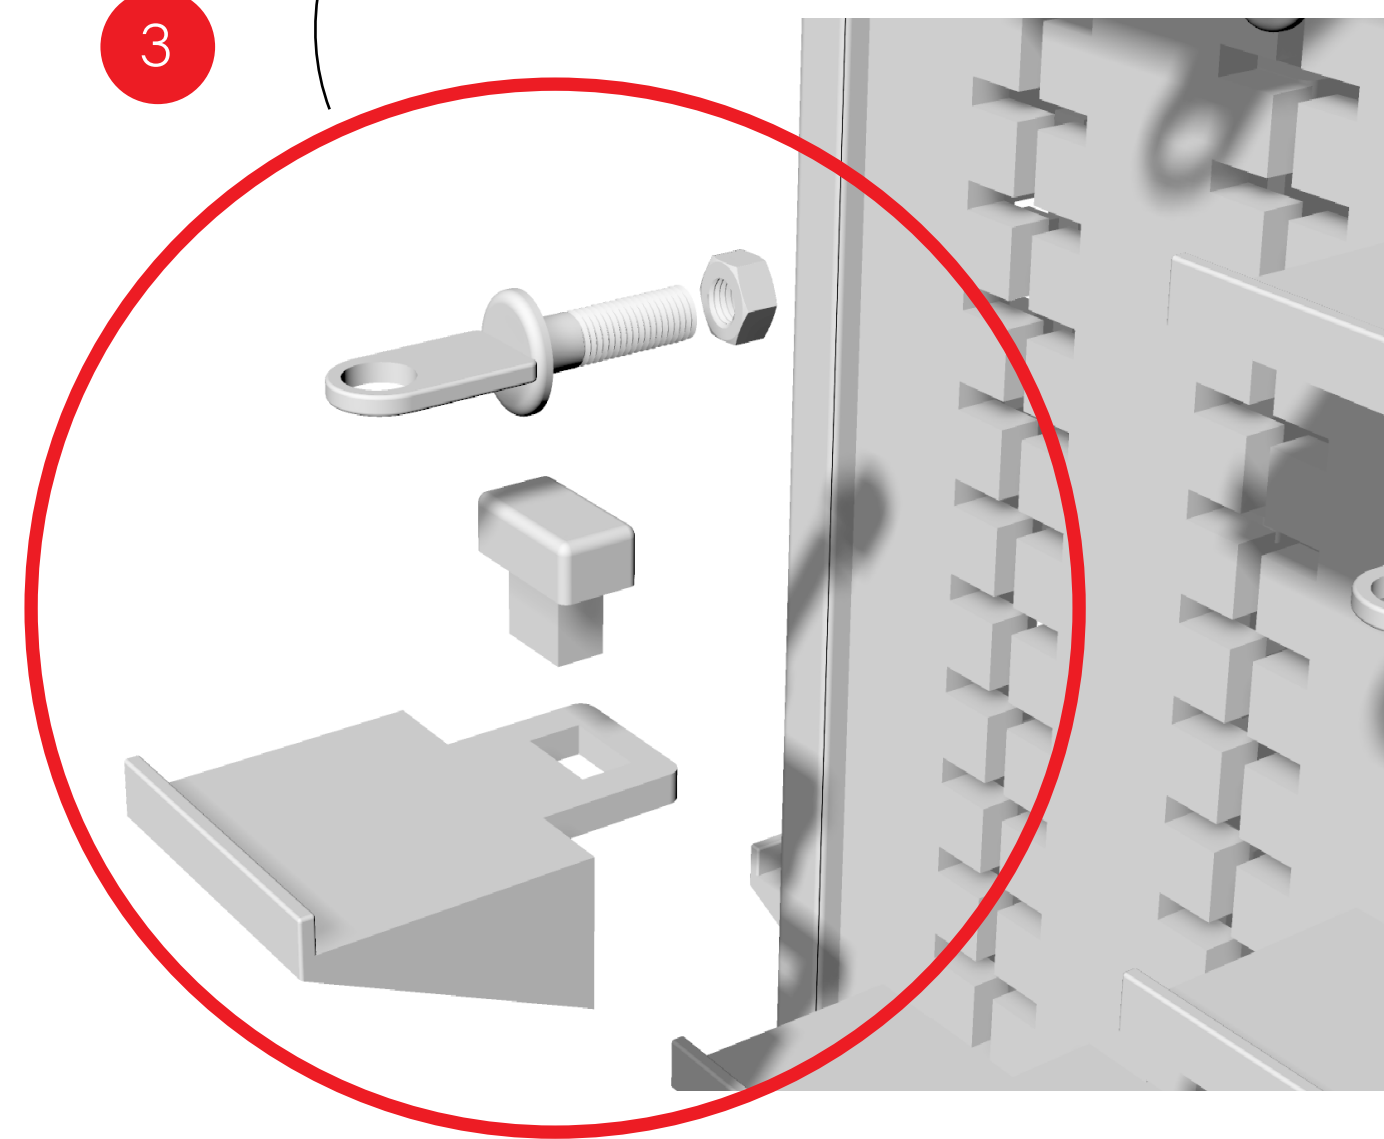

Use the finger slot at the top to open the door.

Once opened, you'll see an adjustable space inside that can be set according to the height of the perfume bottle. This part can only be adjusted from the inside and will stay fixed once set.

2

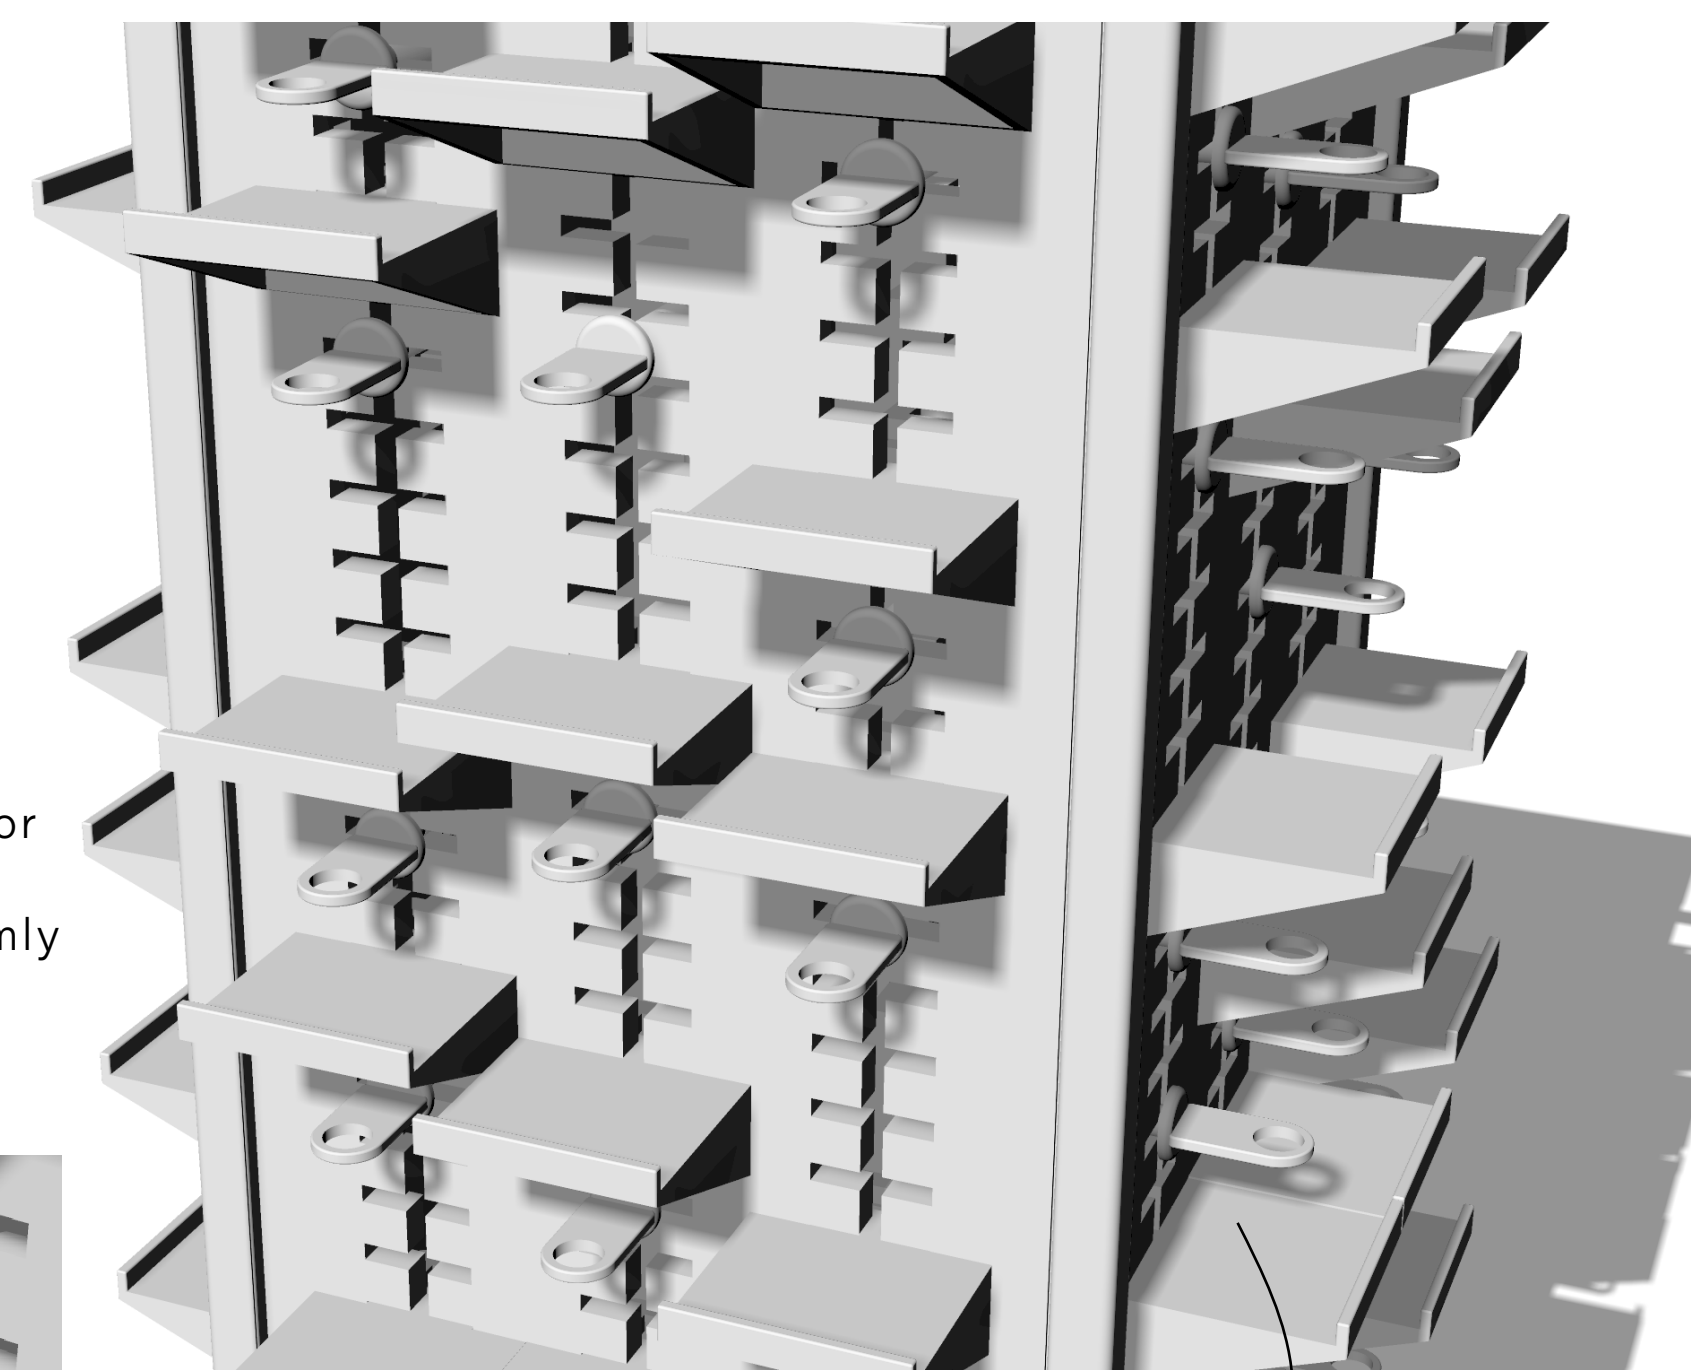

3

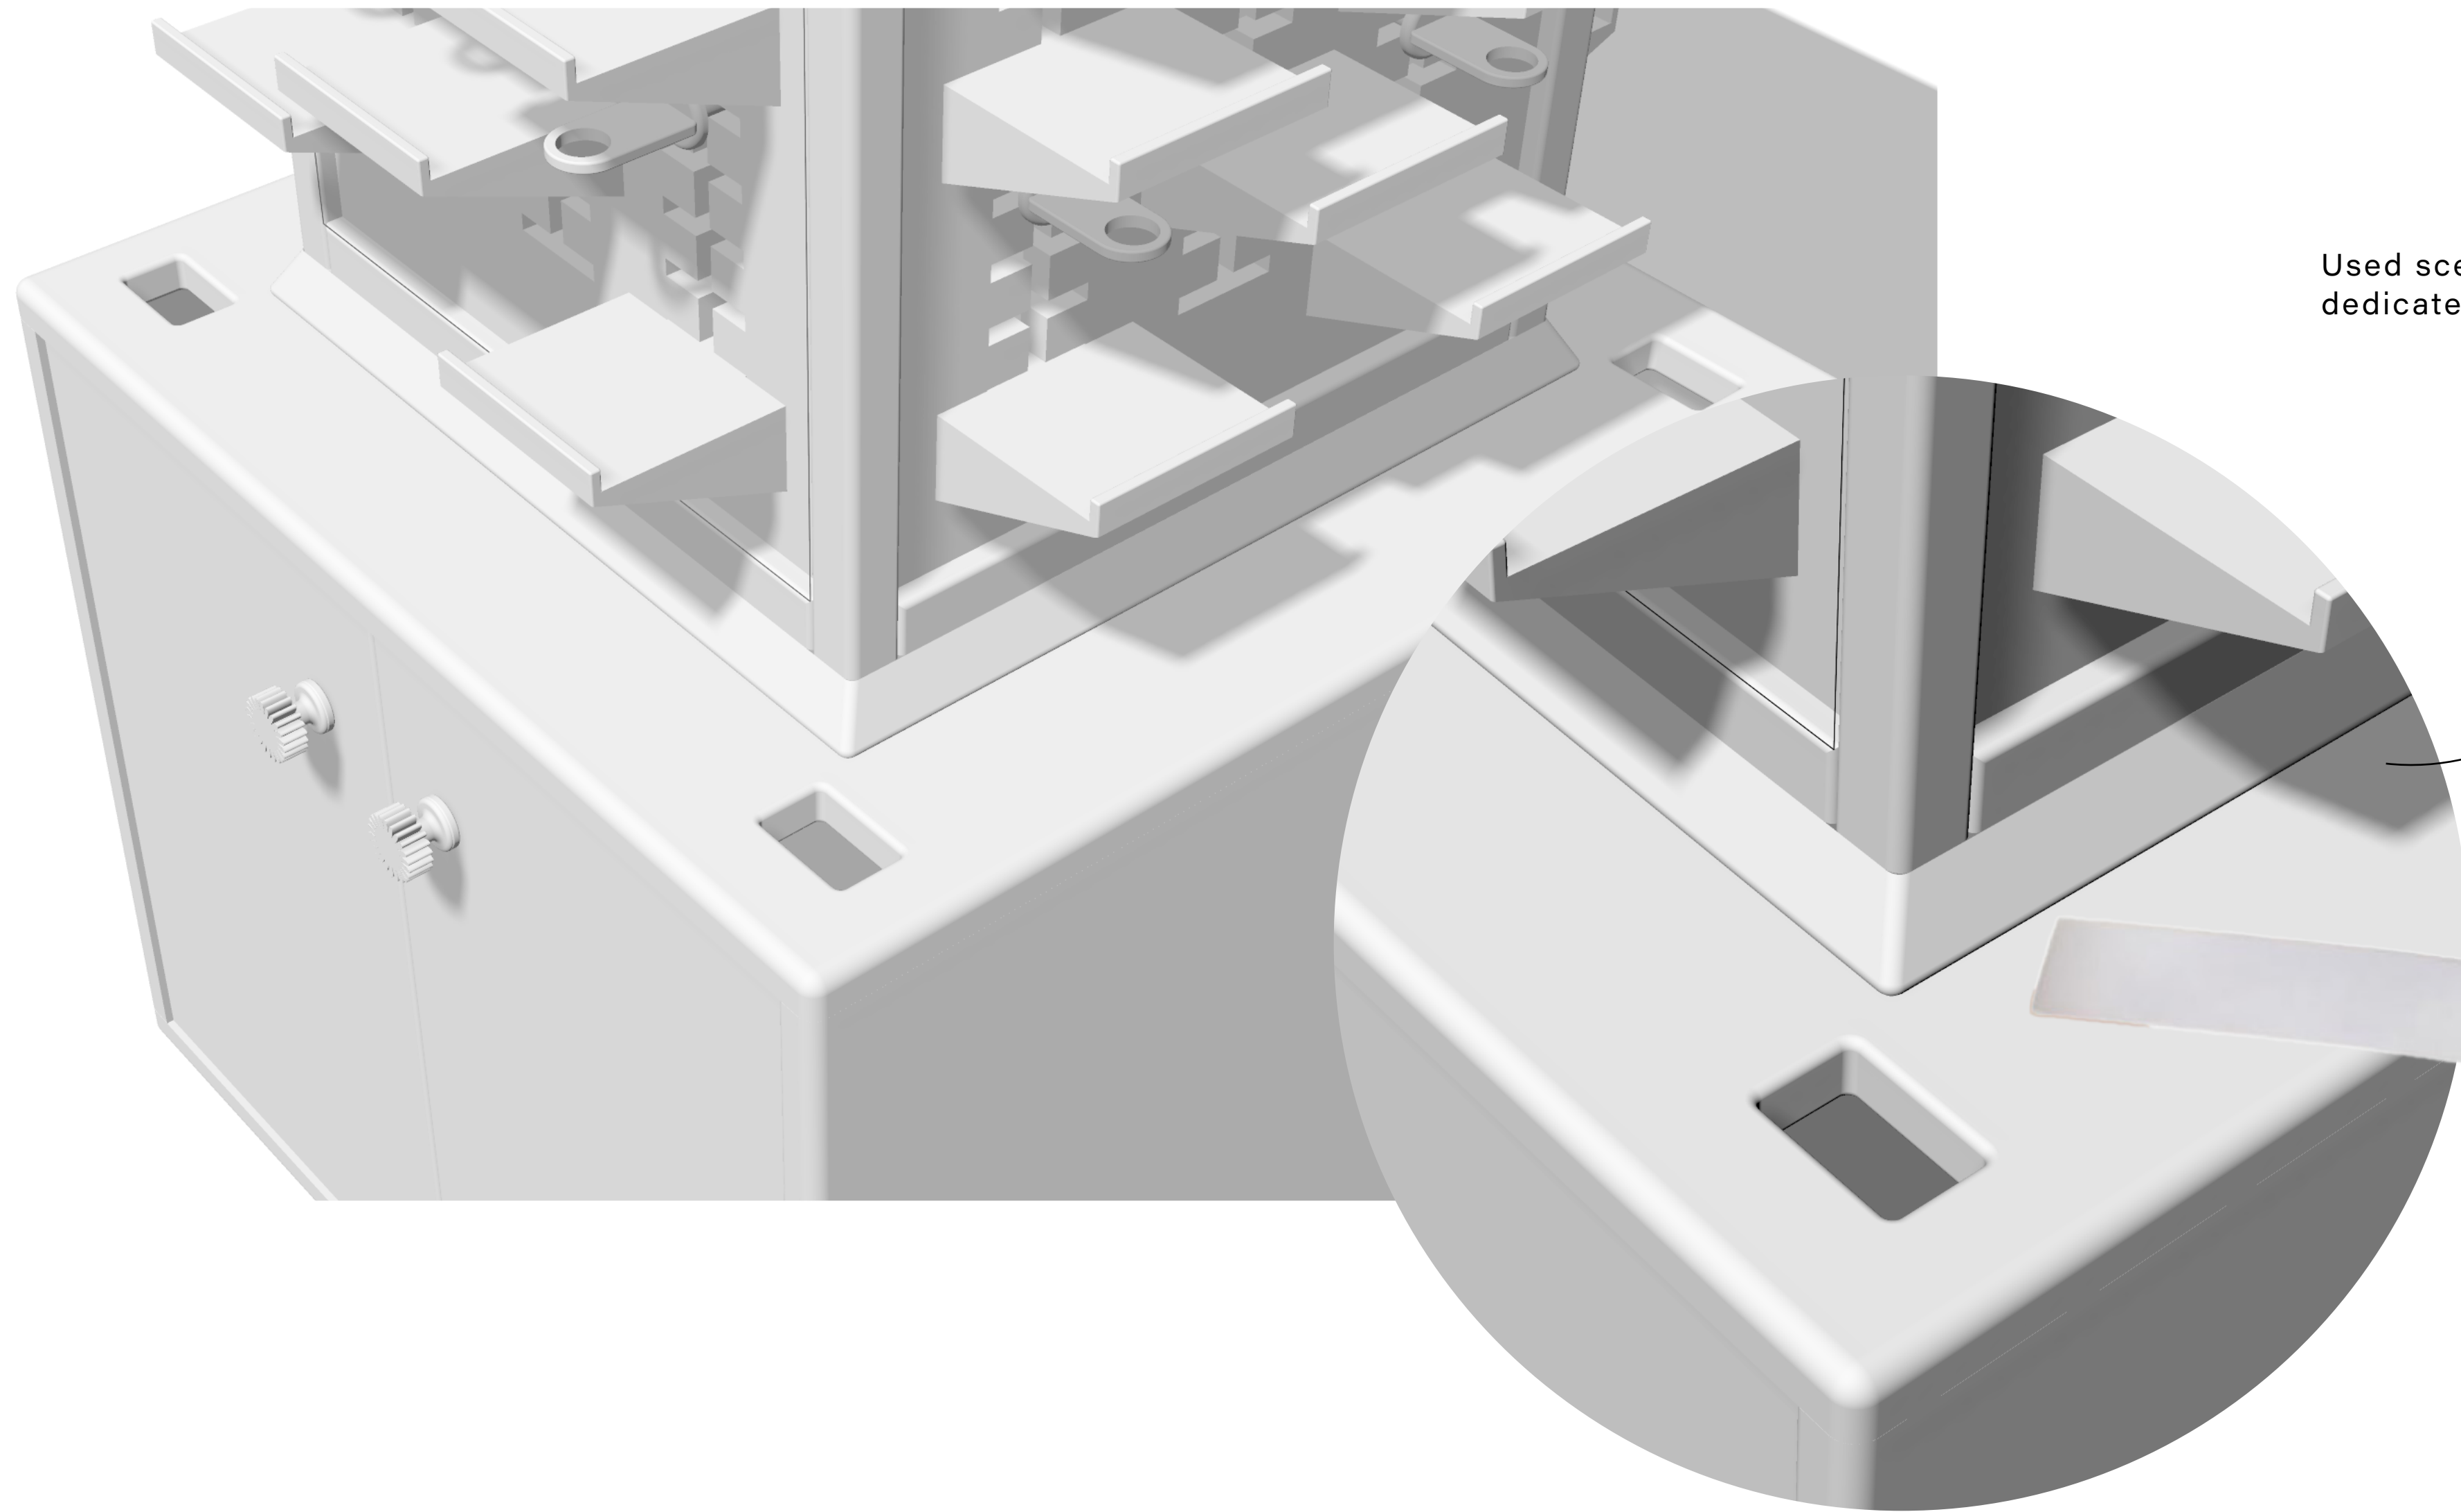

Secure the perfume using two fixing tools — one for the spray head and one for the base. Tighten the screw at the spray head to keep it firmly in place.

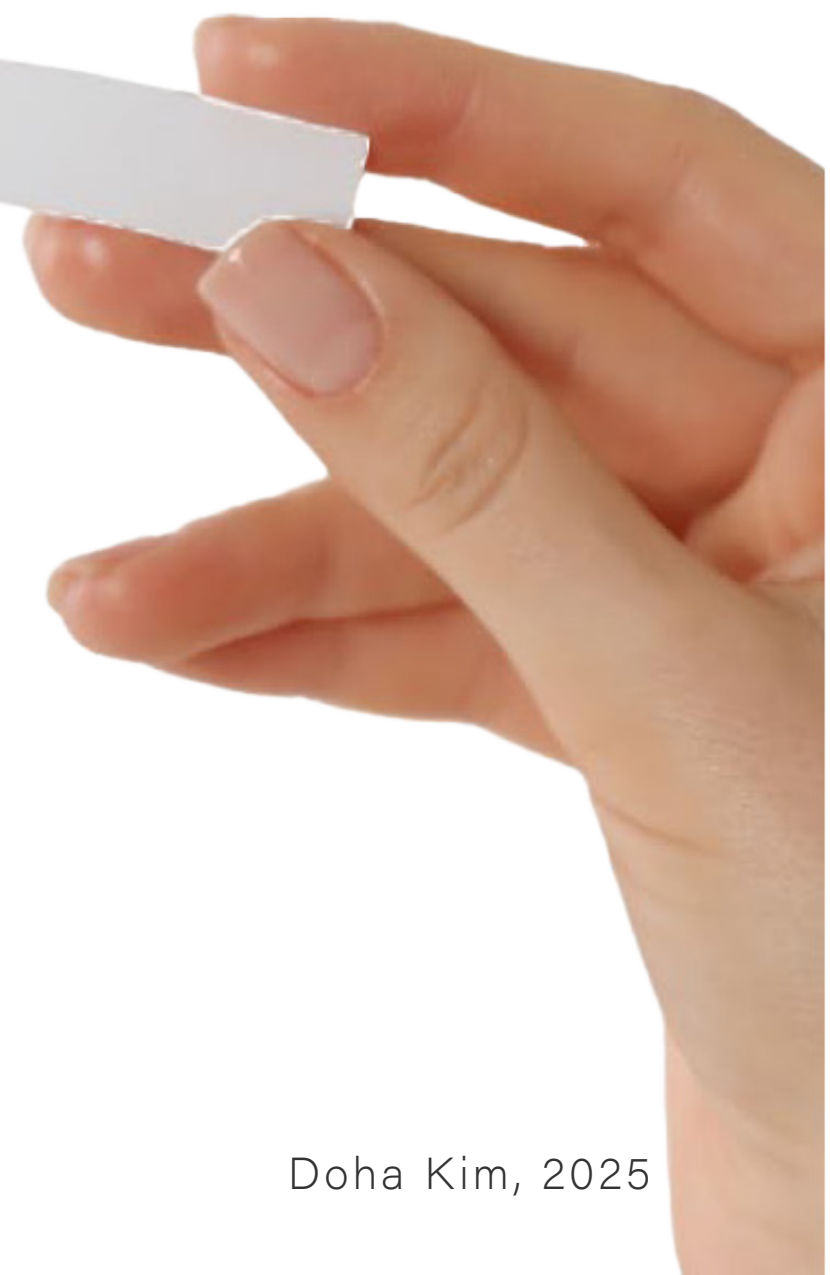

4

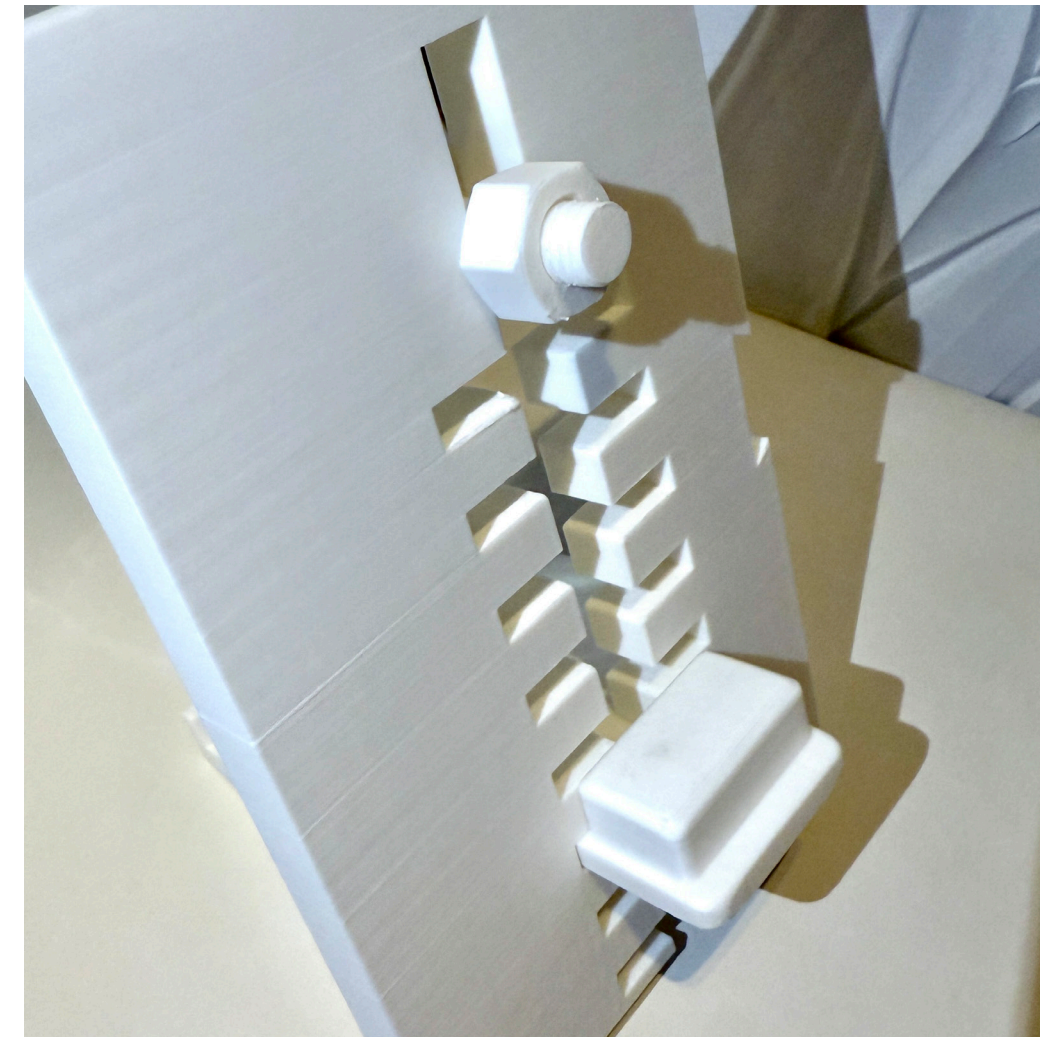

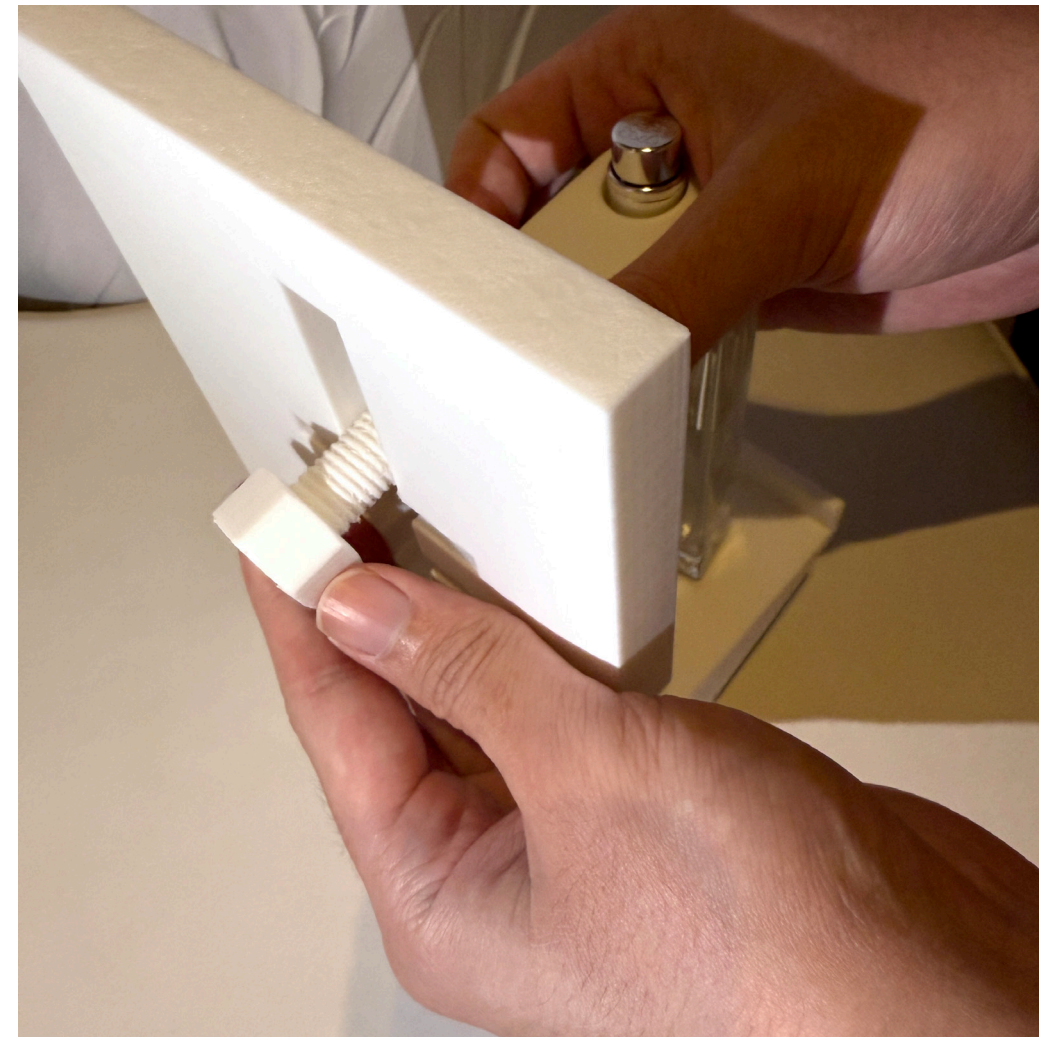

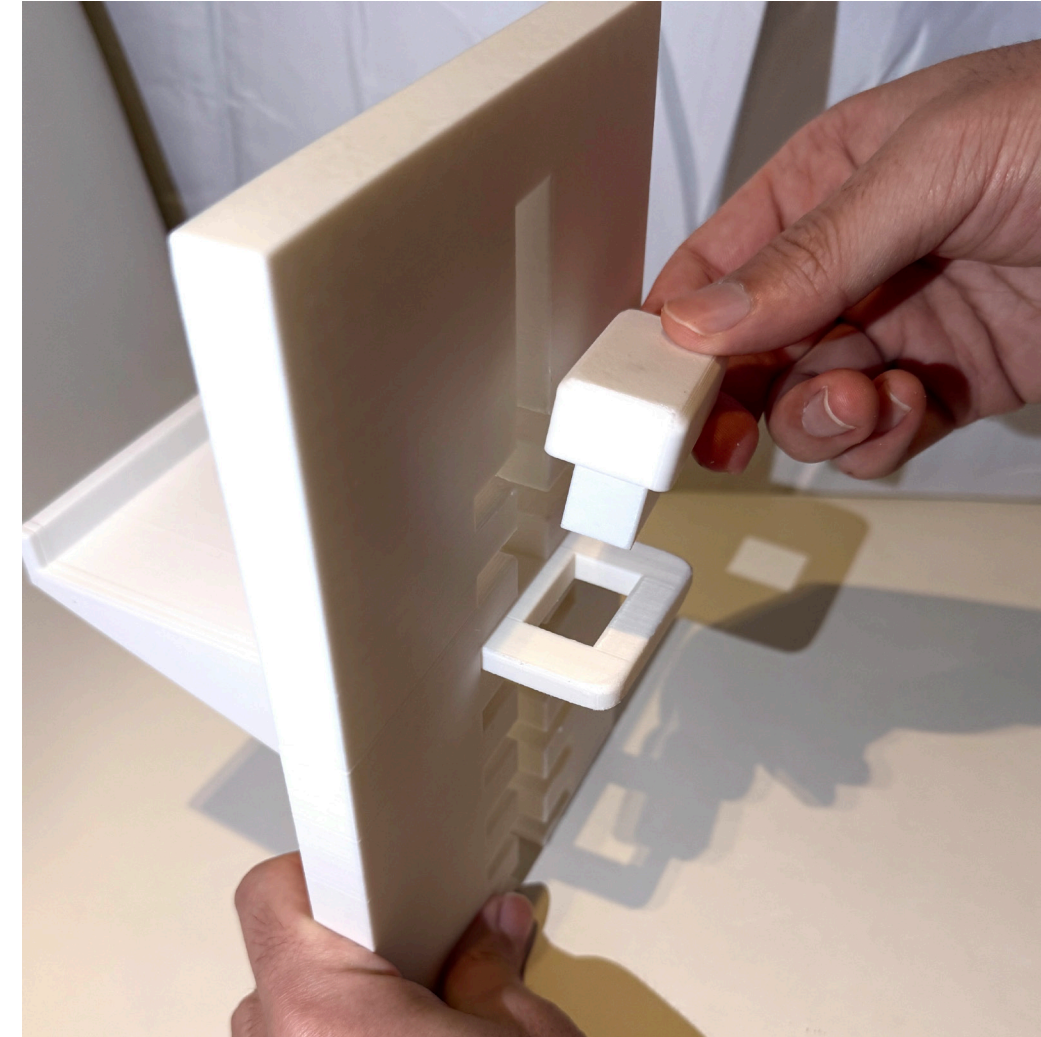

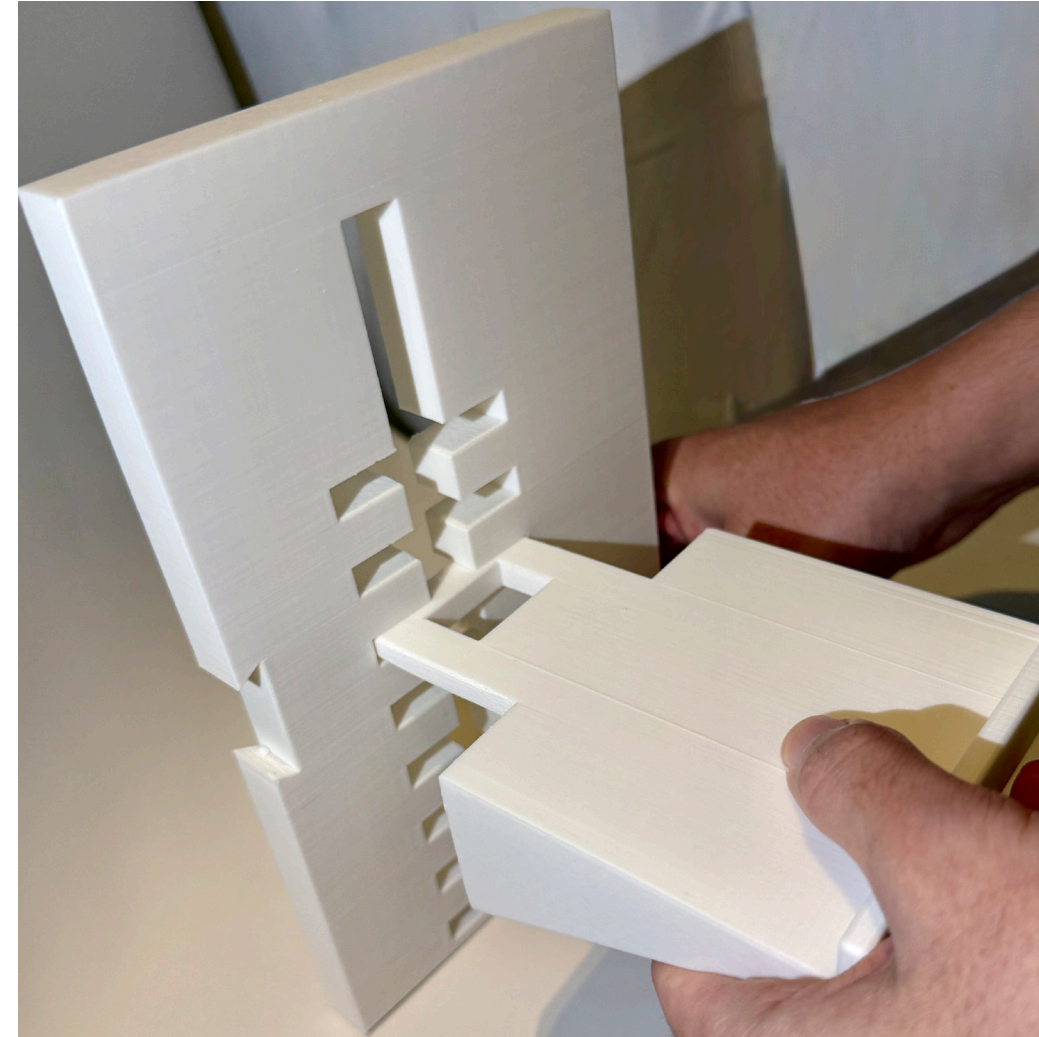

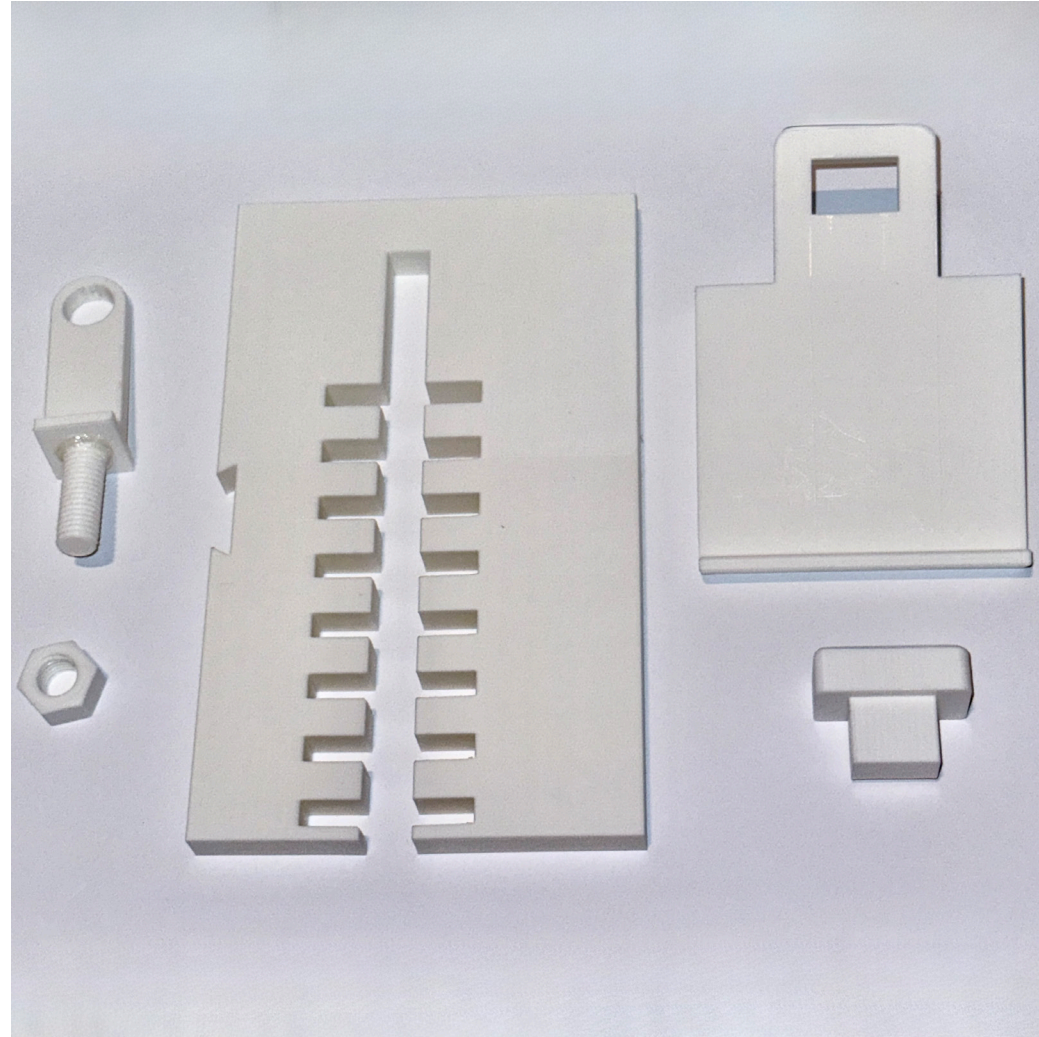

After everything is secured, close the door to finish.

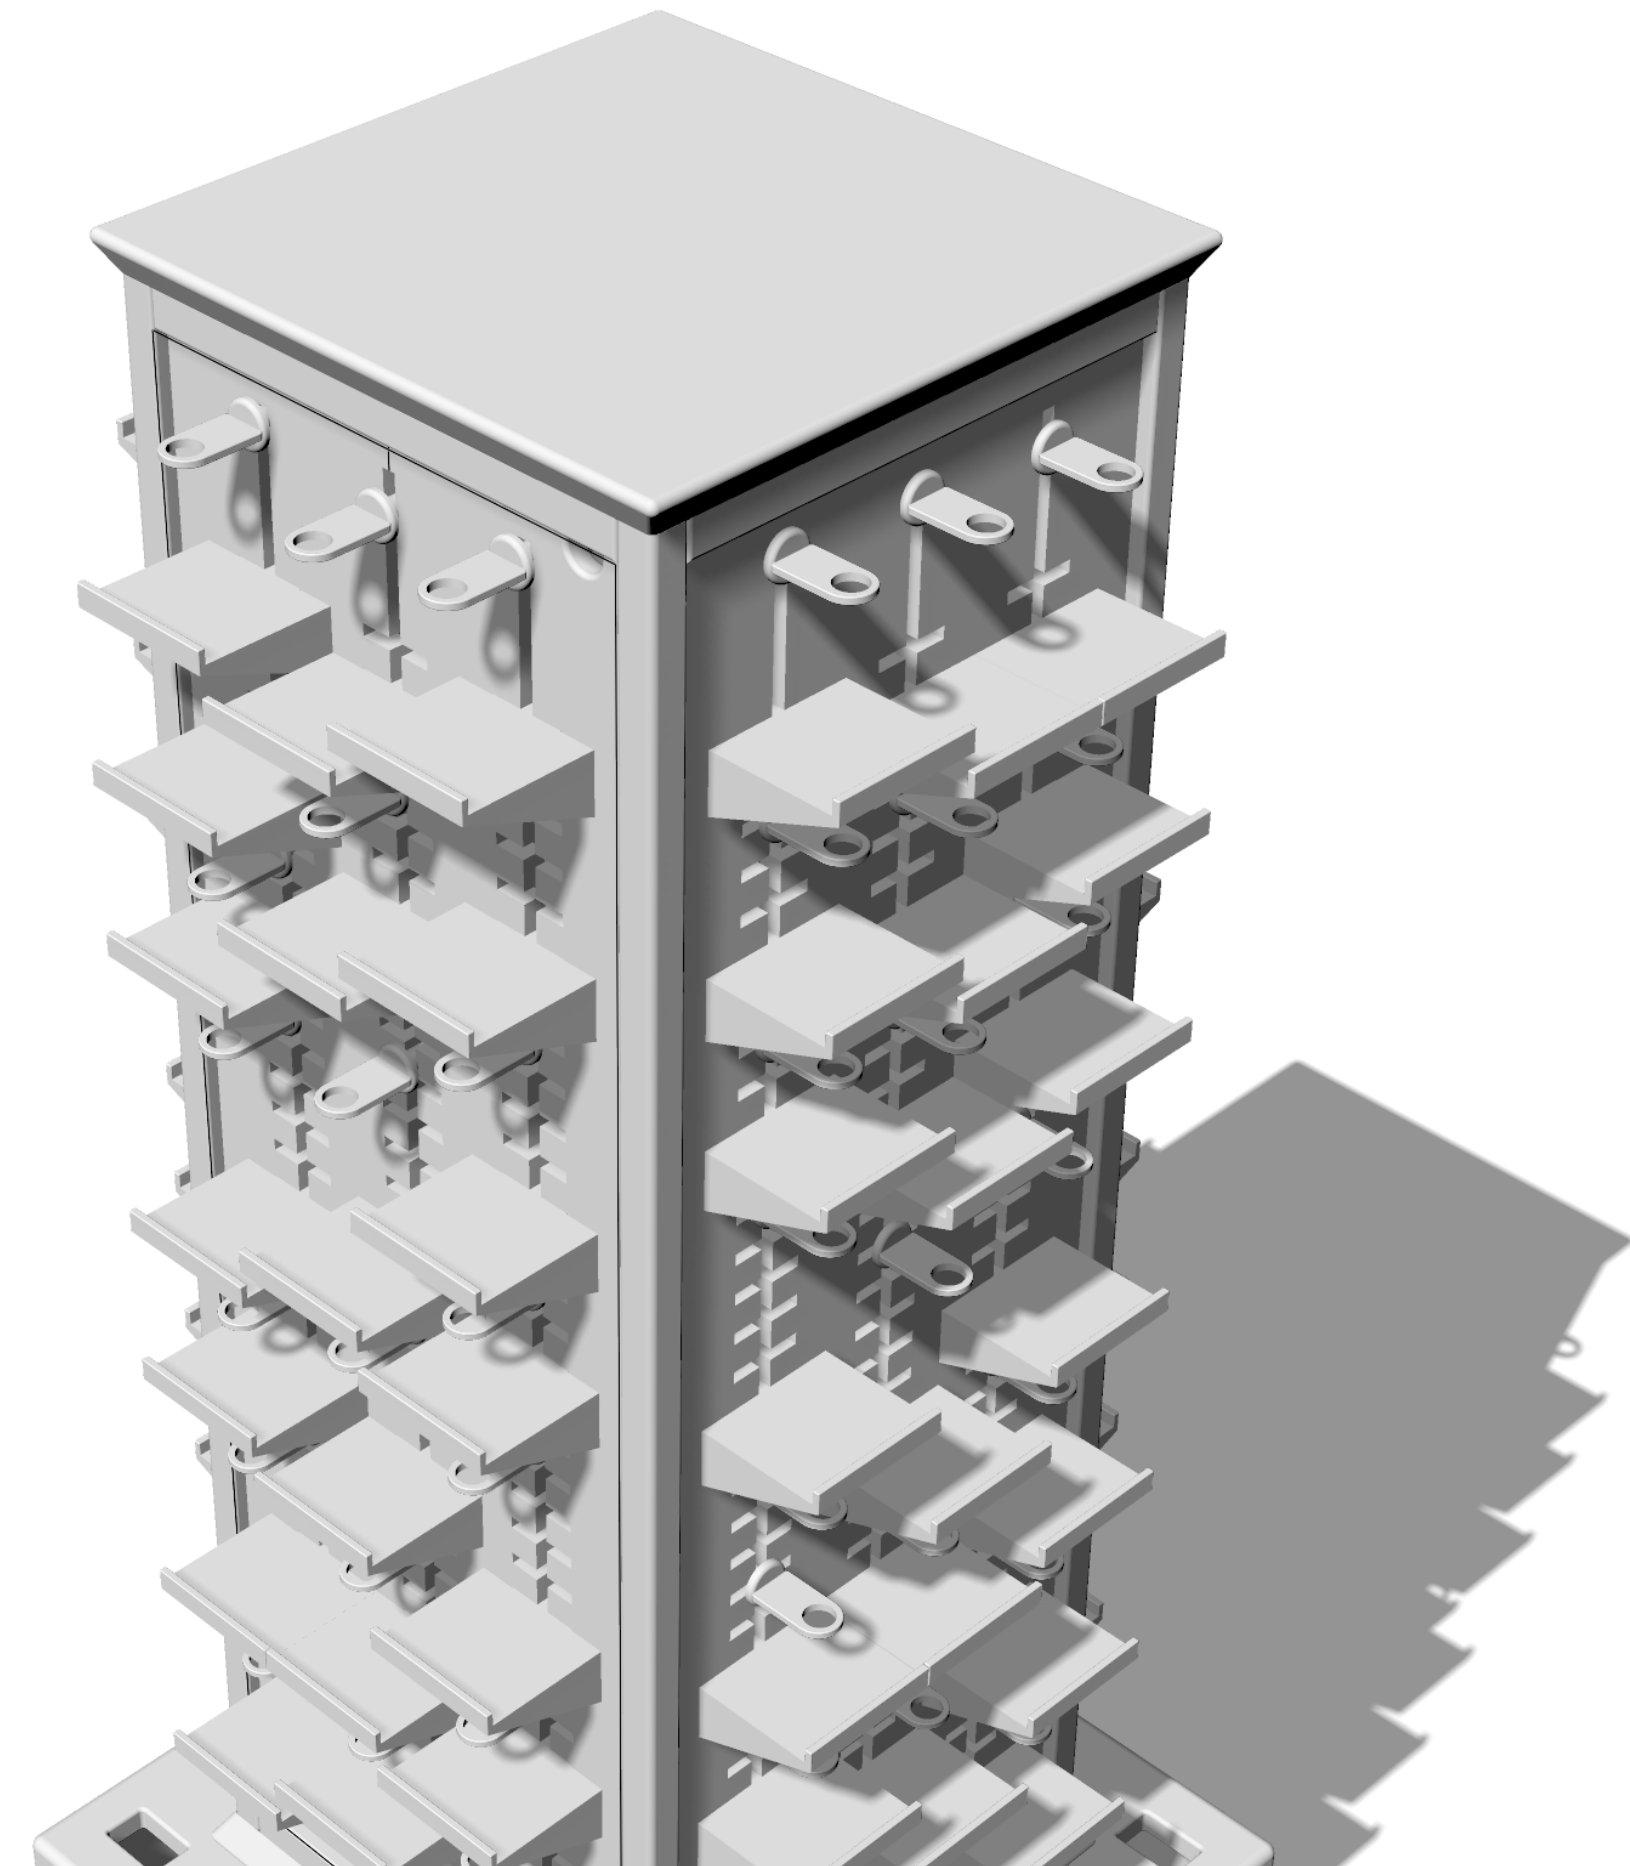

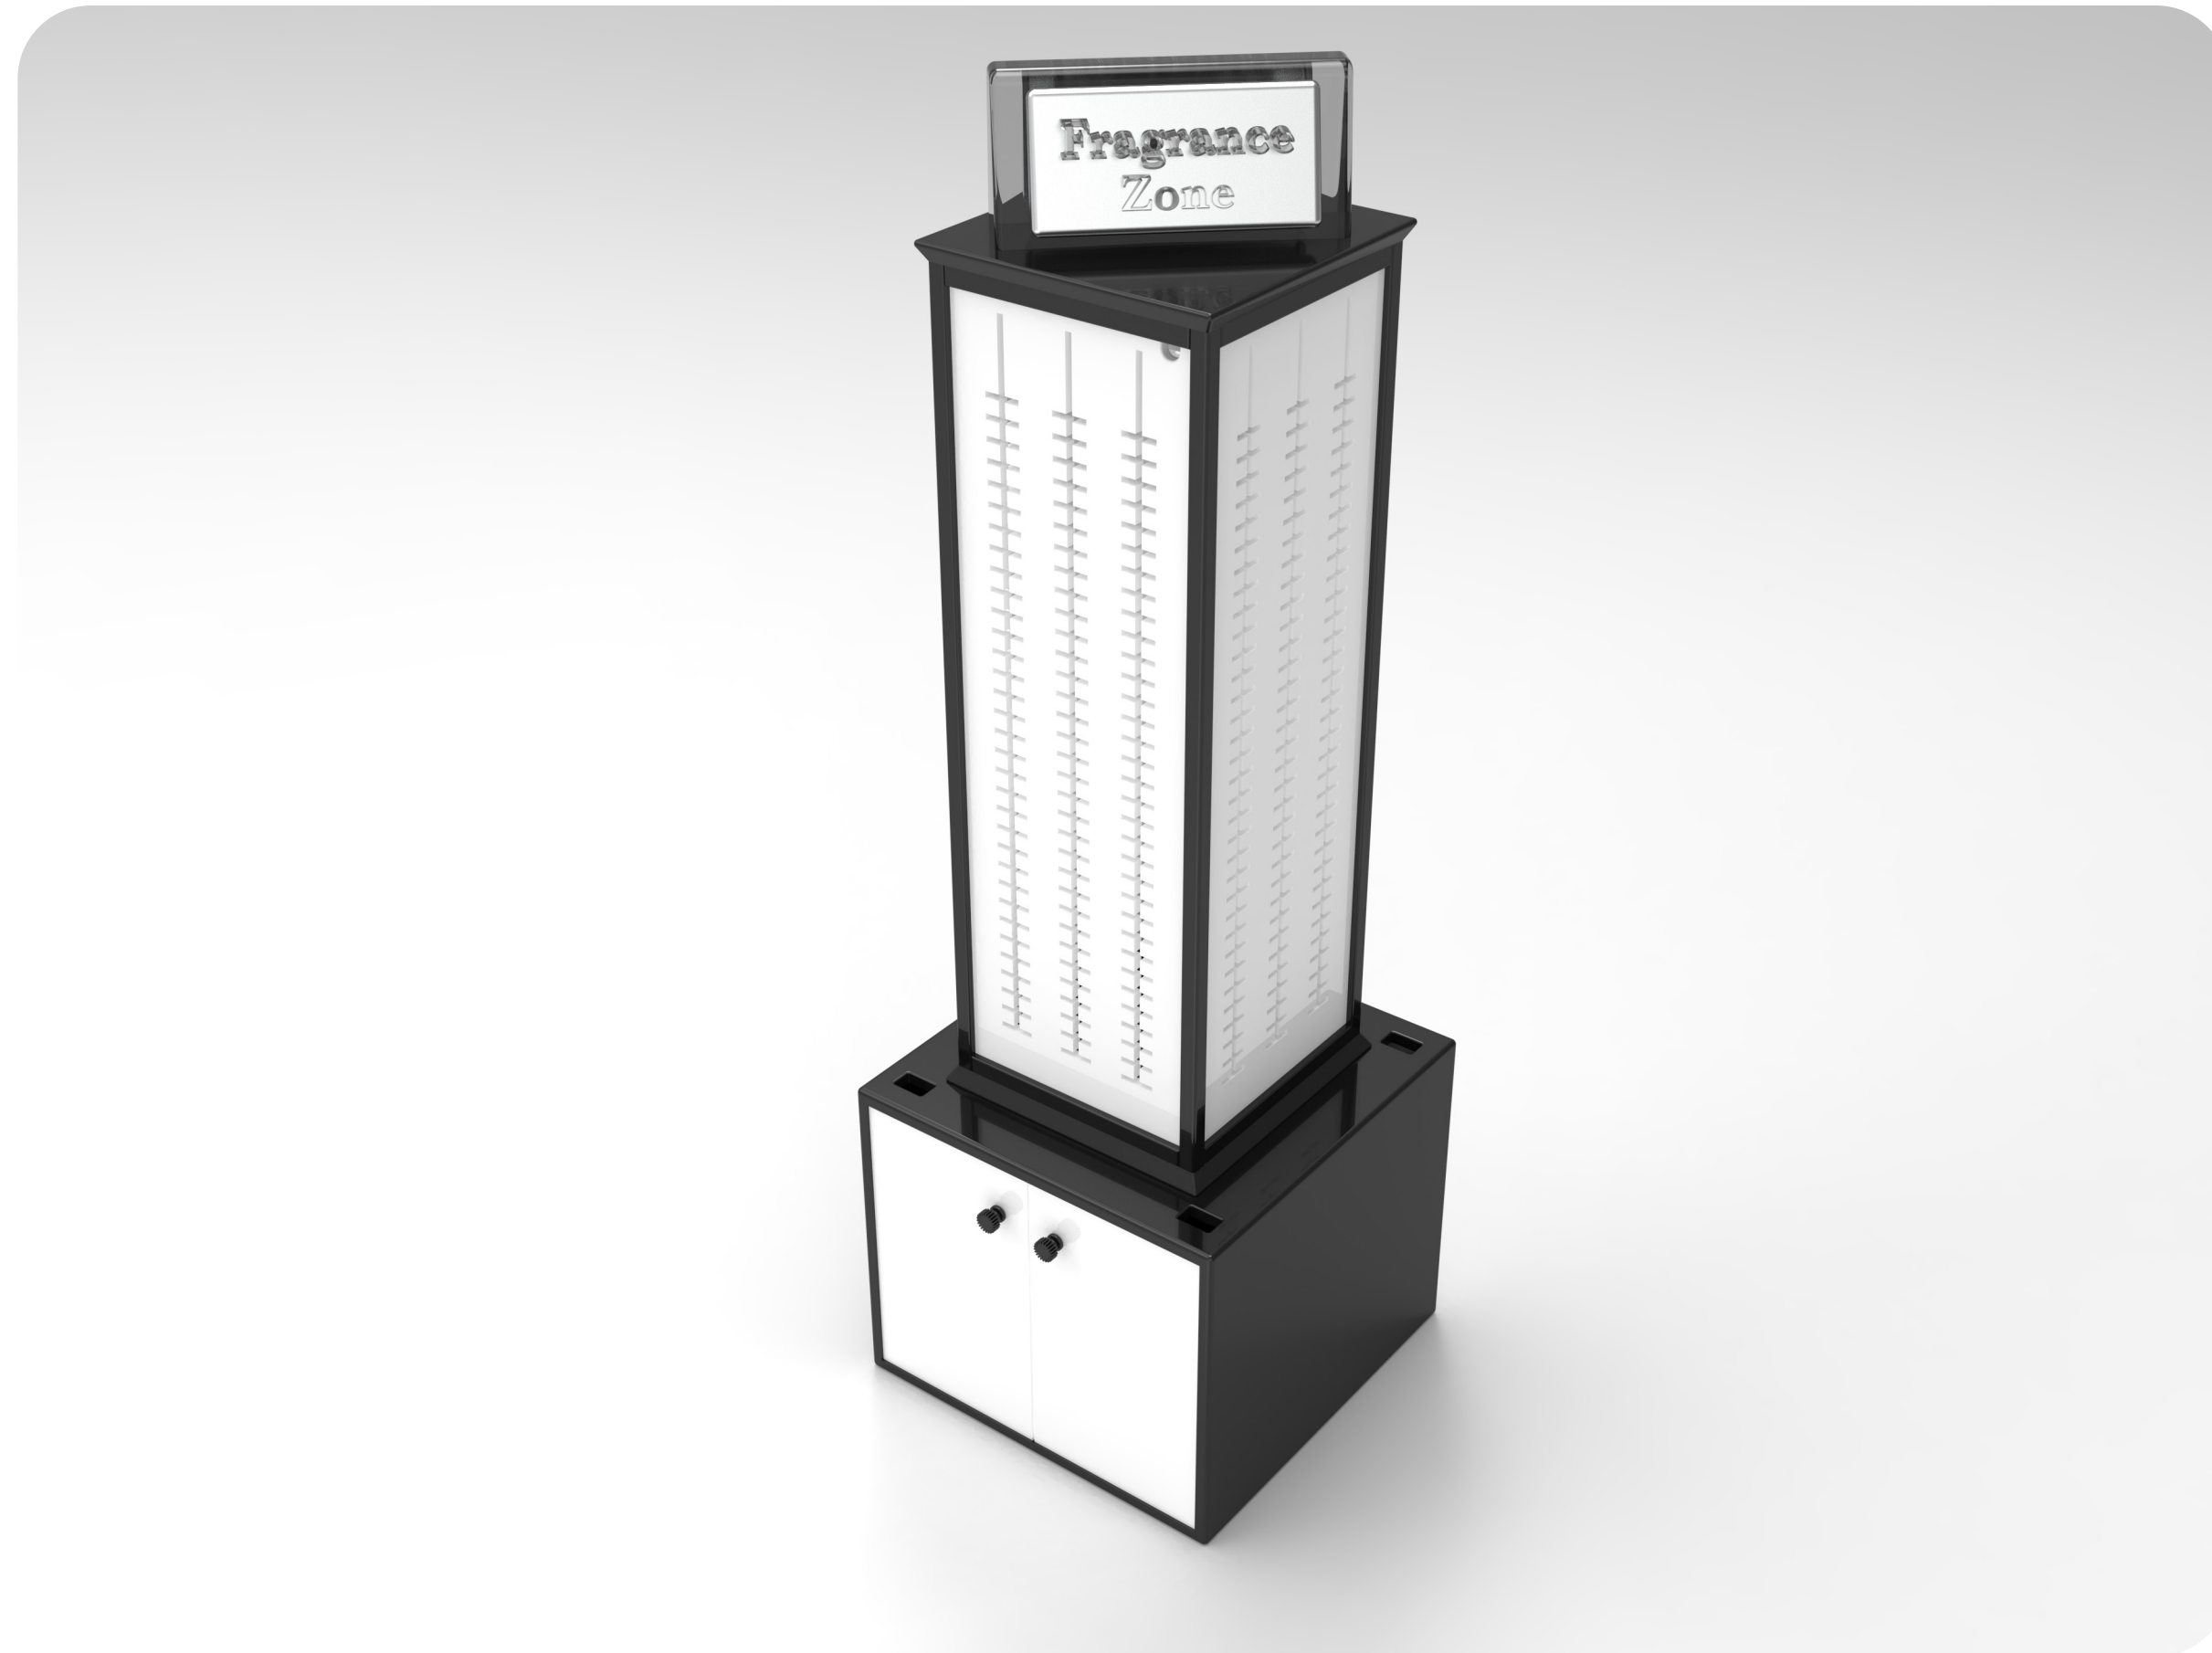

Used scent strips can be thrown away in a dedicated bin to keep the tester zone tidy.
