

THEME 1: PROTECTION.

I really like this cocoon shaped jacket, it gives the impression that this jacket is supposed to protect you from the outside world and the added armour elements reinforce that.

When thinking about protection details, I remembered a garment I made in first year, and I wanted to re imagine it in my new style and concept. So I thought about how to redo the ribbed circles but with a protection element.

I think quilted trousers are really hard to pull off so to make this look a bit more appealing I will pair the puffer with another trouser from my range, this will put the focus on my puffer too.

THEME 2: FUTURISTIC PANELLING.

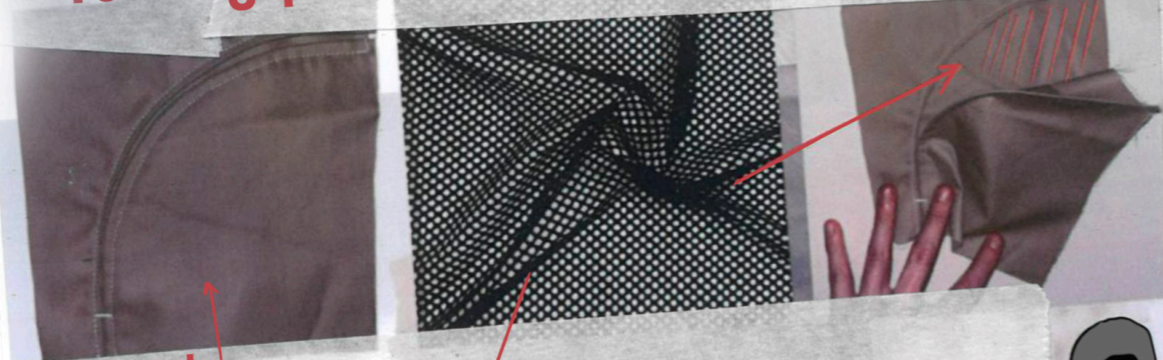

After developing my one piece pattern I changed it to be looser for the scarf jacket with vents and then slimmer and more cropped for the denim jacket. The base pattern is the same.

THEME 3: MOVEMENT

Testing pleats

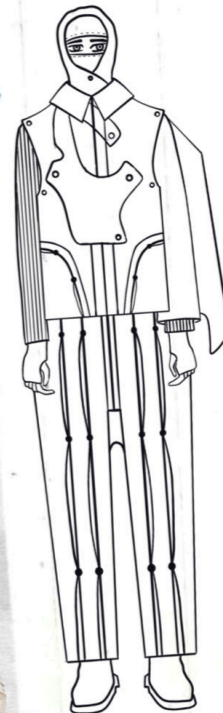

Underarm

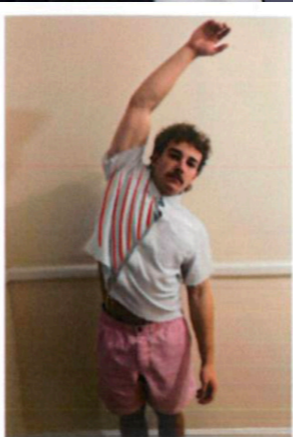

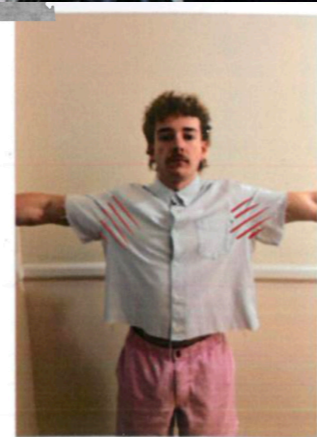

Chest

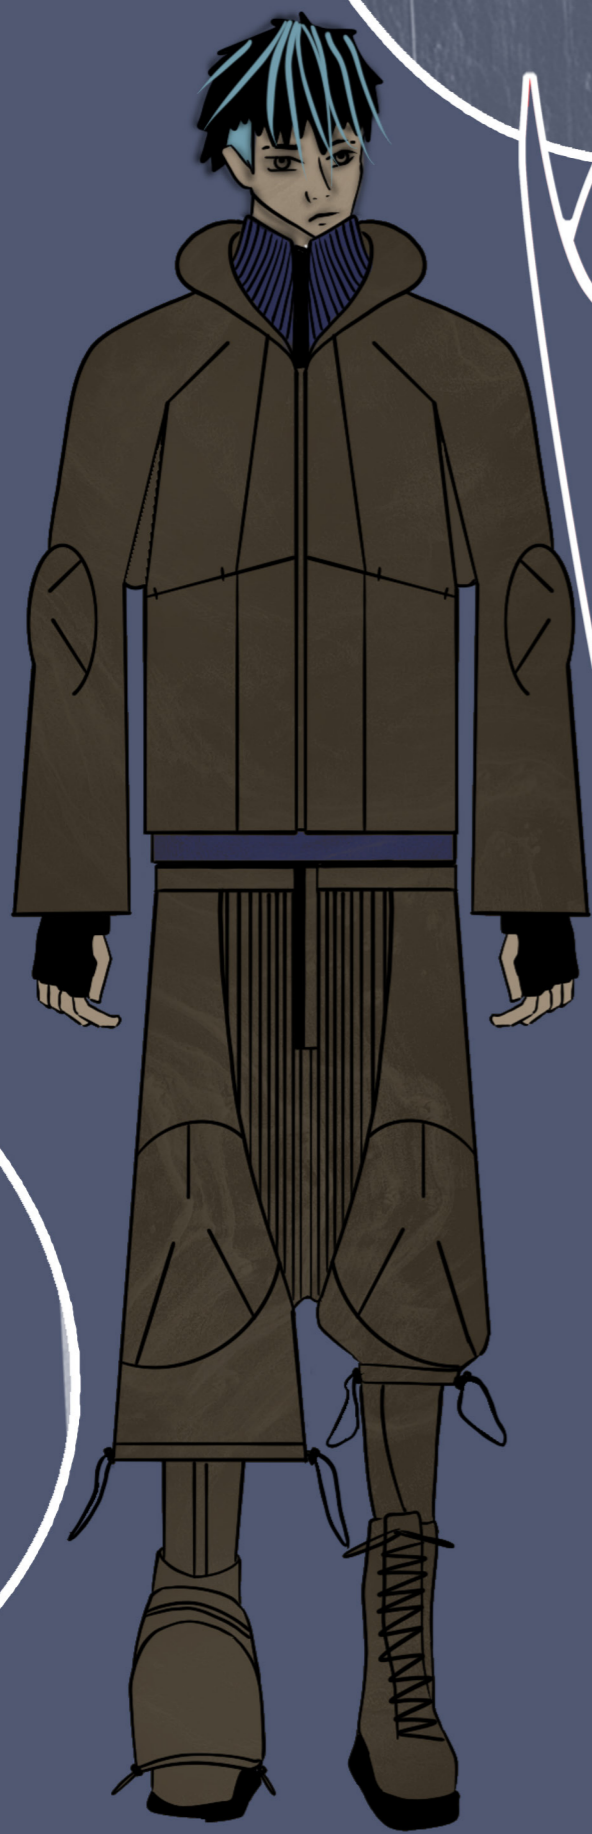

Doing things such as escaping danger and partaking in physical exercise will be crucial in my world. How will sports wear adapt to be able to be worn in day to day life. But also functional on the go. I have experimented with both gussets and pleats and I would like to develop these into some of my final looks.

Testing gussets

THEME 4: UTILITY
