

SENESCENCE

A story of life, experiences and embracing ageing as a woman.

ELIZABETH WOOD

Concept

In this project I aim to explore the process of aging from a woman's perspective, drawing inspiration from my Mum's experiences at different points in her life. The story for my project will comprise of key memories that defined her life and at different ages, creating a costume made up of garments inspired by these moments.

I was inspired to explore this topic in my project as a response to the discussion of aging and the rise in trends of anti aging over social media.

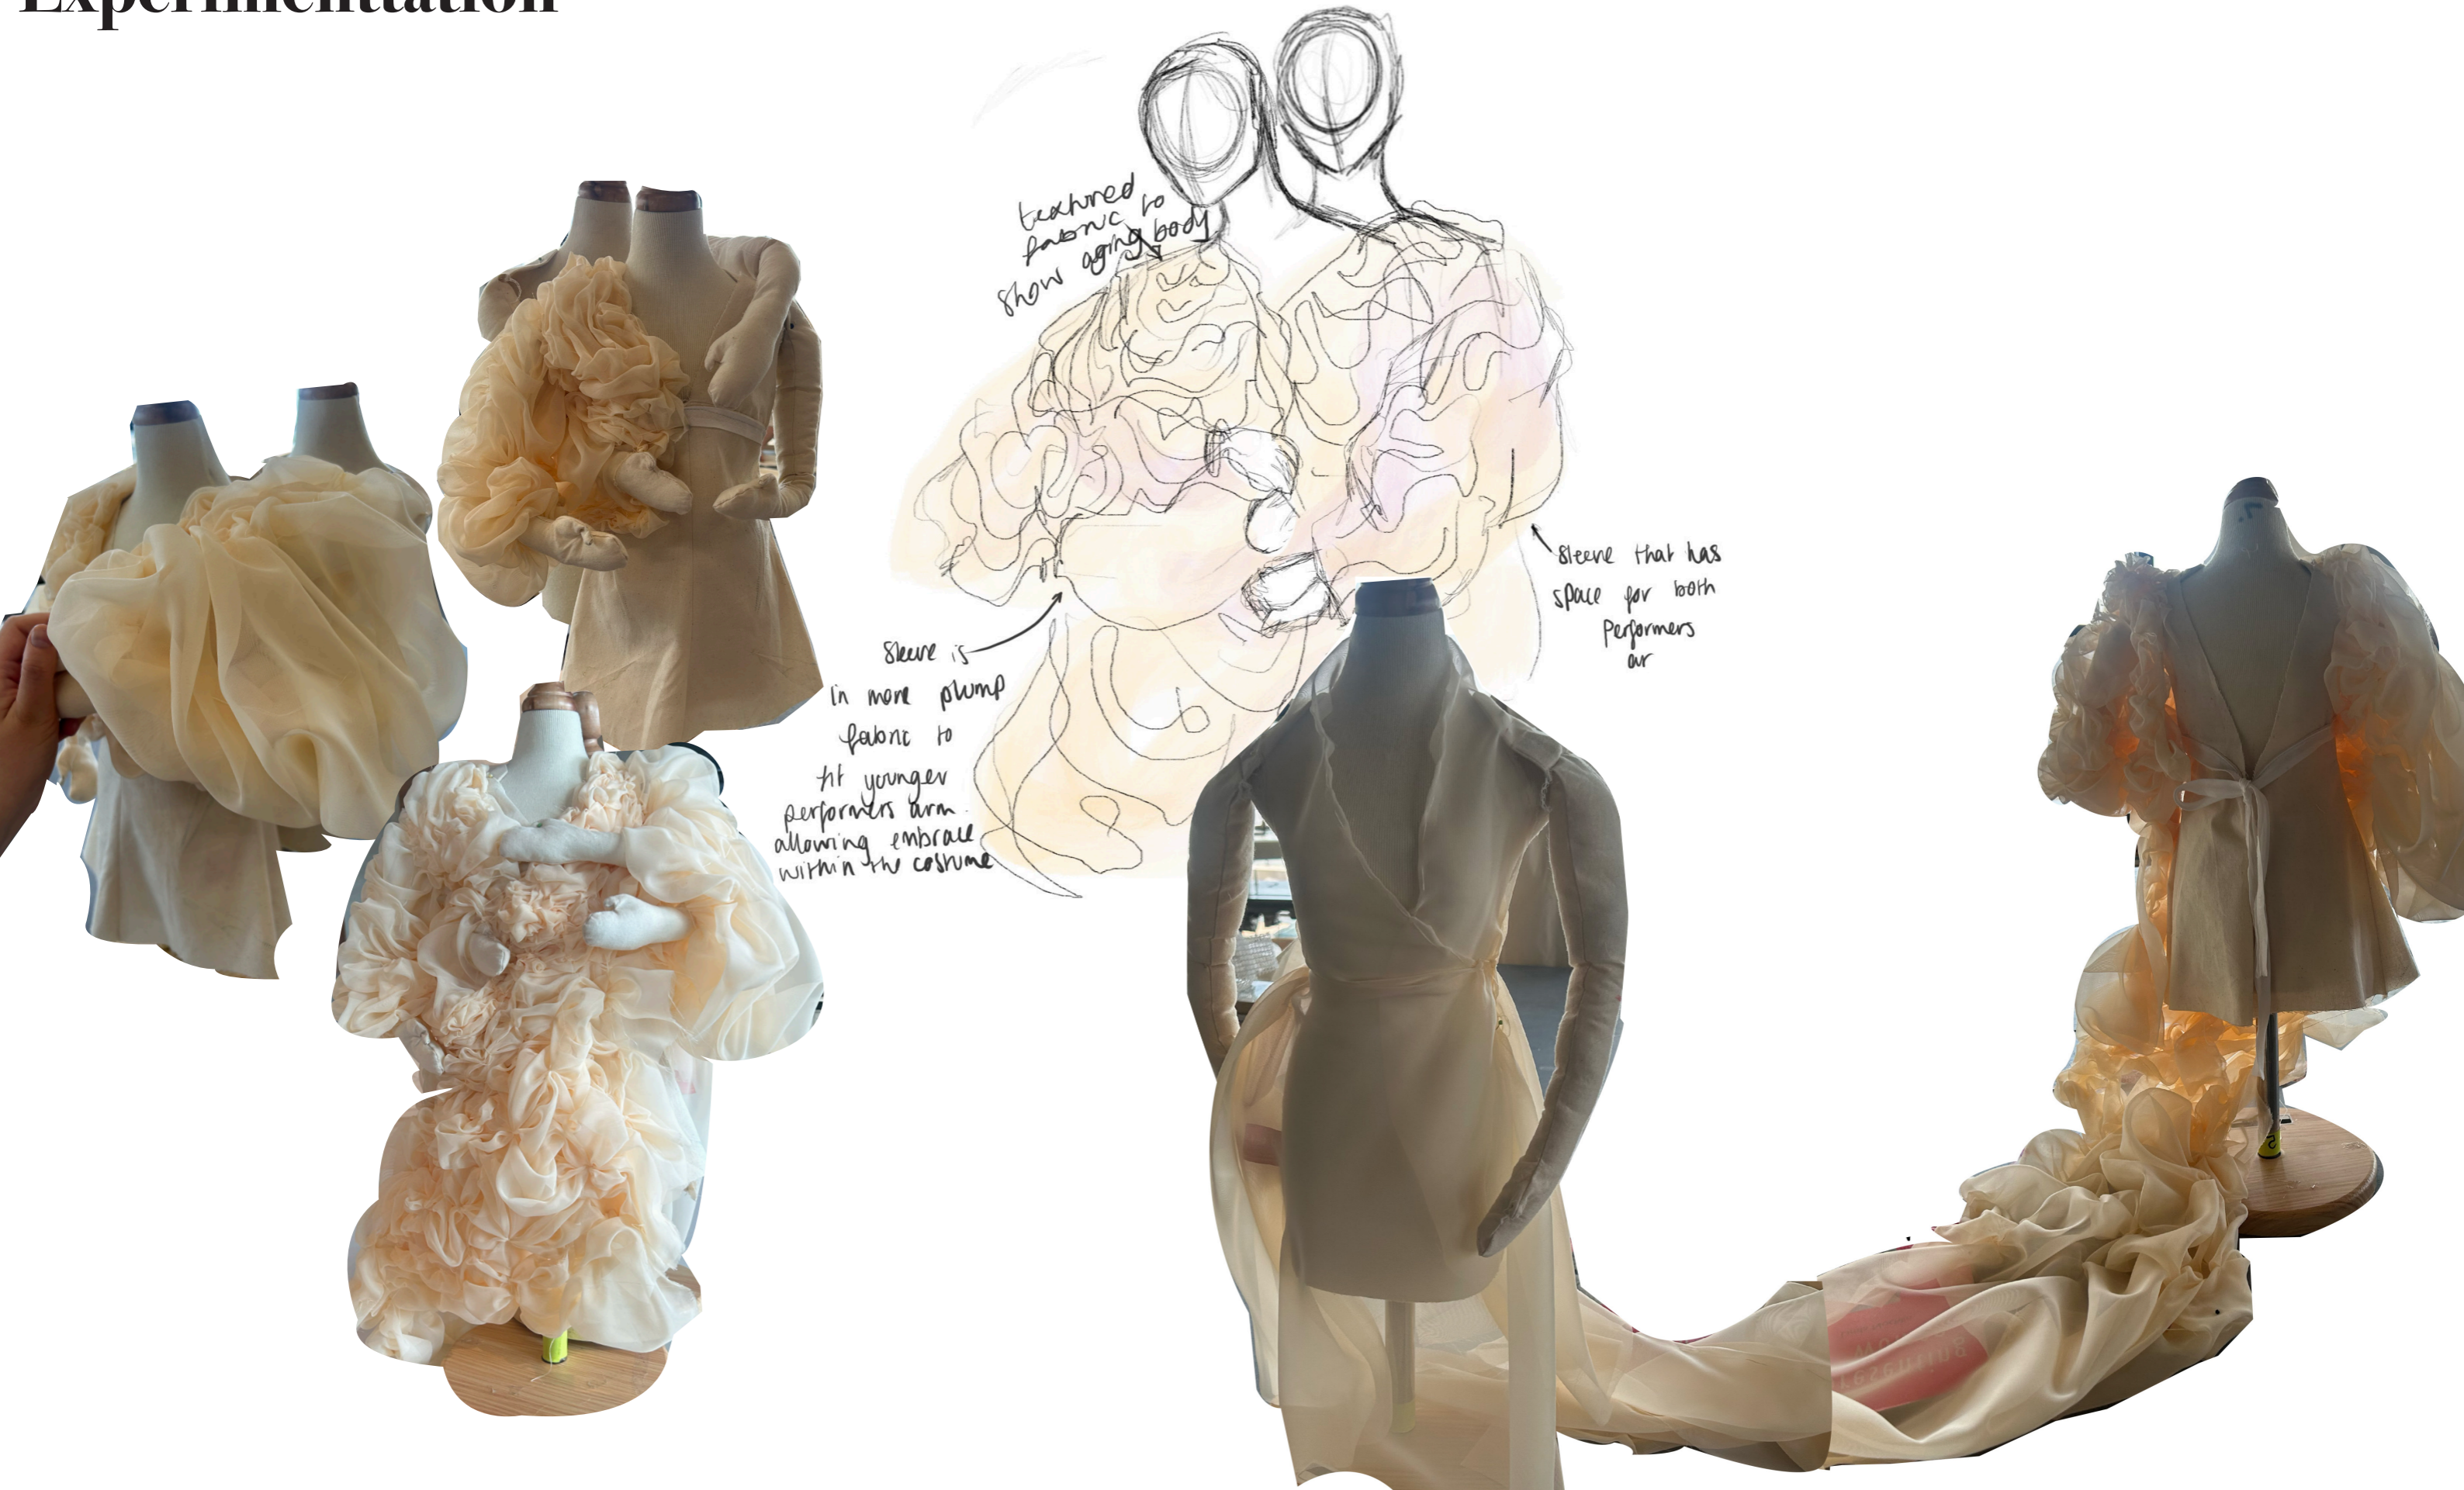

For my project I wanted to create a project that celebrates aging focusing more on the experiences and memories that come with this, finding purpose and beauty in wrinkles and changing bodies.
