

Bowknot Ring

During our conversation, the client mentioned wanting to prepare a birthday gift for herself, a ring that would truly belong to her. She is someone who consistently excels at choosing thoughtful gifts for her friends and family, yet when it comes to giving something to herself, she finds it hard to decide.

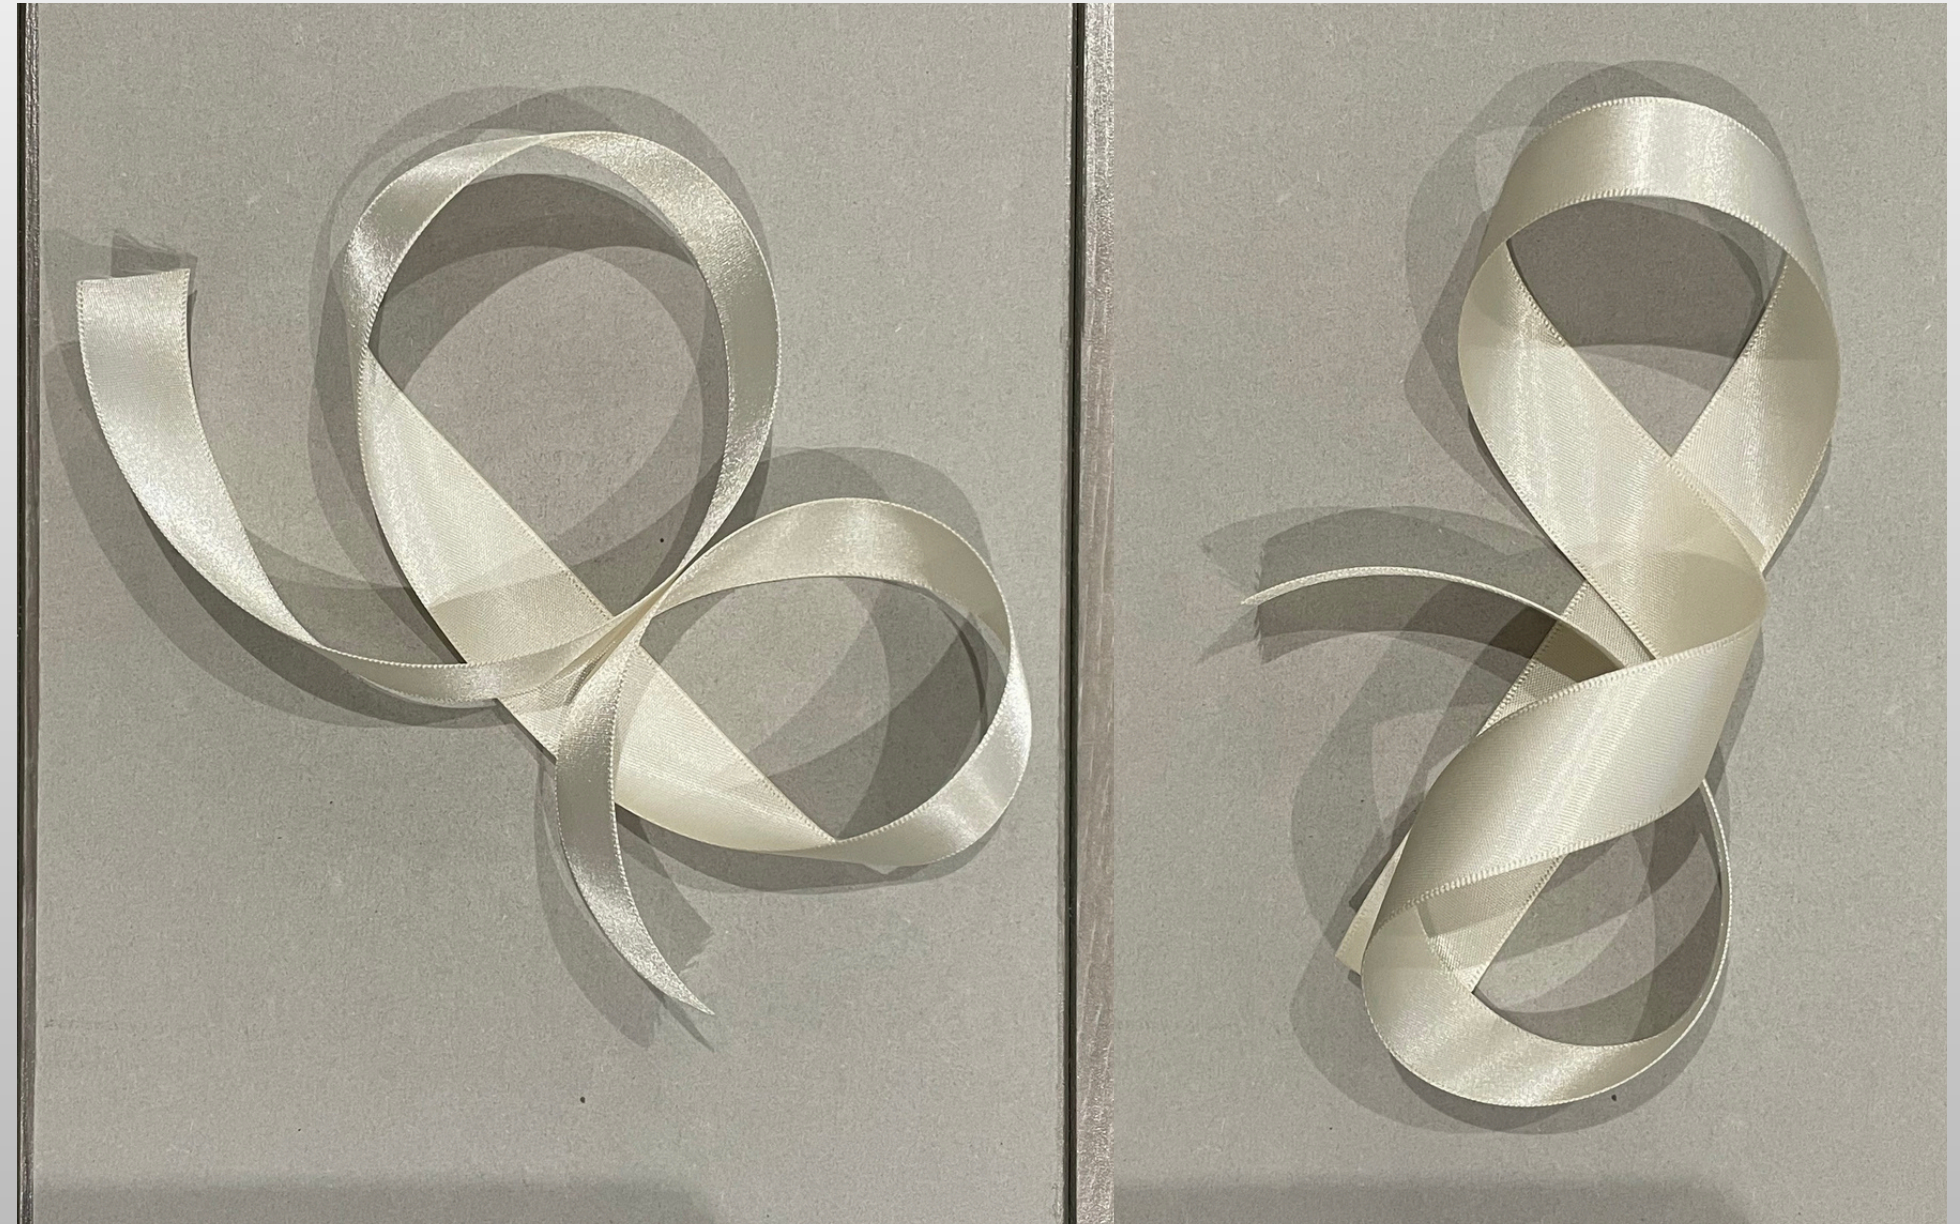

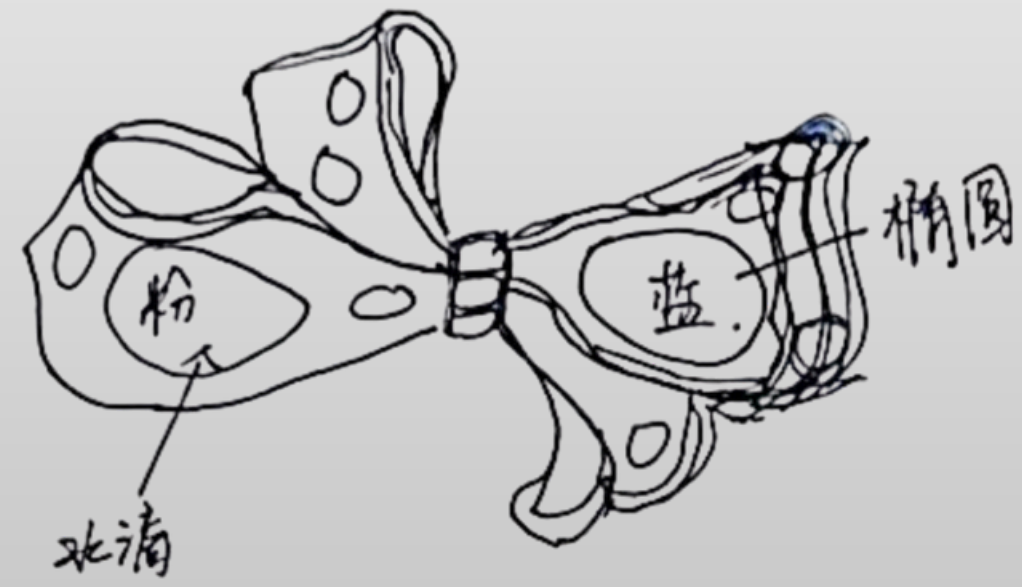

We suggested taking inspiration from a ribbon. Ribbons often appear in gifts, celebrations, and precious moments. They are not only a bond that conveys affection, but also a knot that safeguards memories. From this idea, a one-of-a-kind bespoke piece was born.

The bow of the ring is pavé-set with sparkling diamonds, symbolising everyday joy and heartfelt blessings. A pear-shaped pink diamond on the left represents gentleness and romance, while an oval blue diamond on the right signifies determination and dreams. At the centre, the two coloured diamonds meet, just like different wishes being delicately tied together.

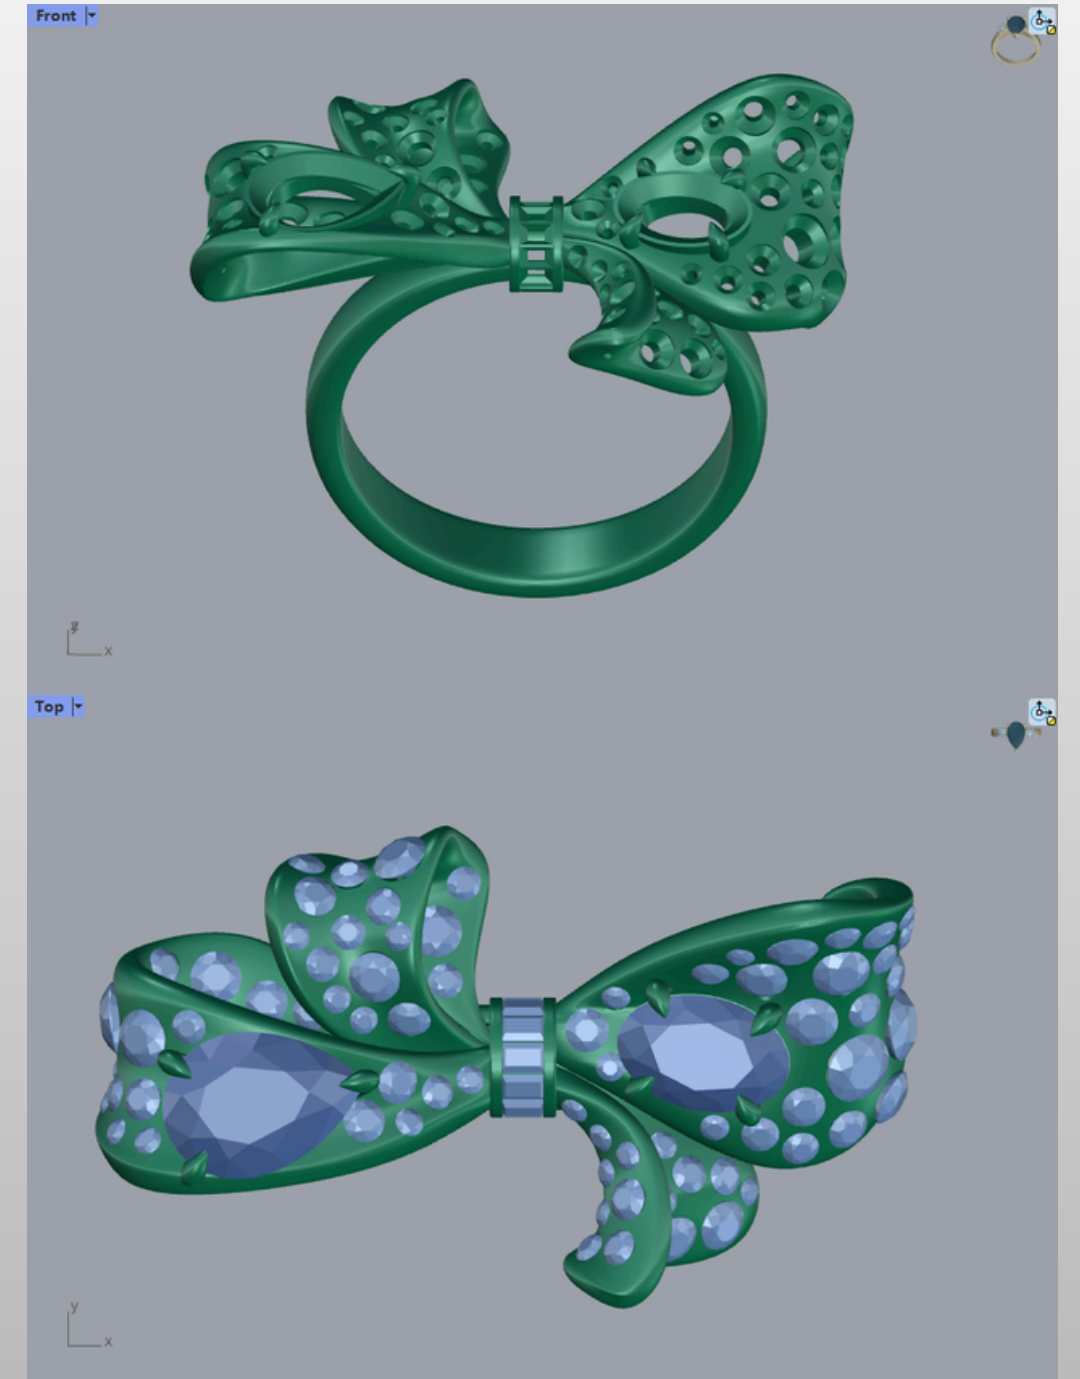

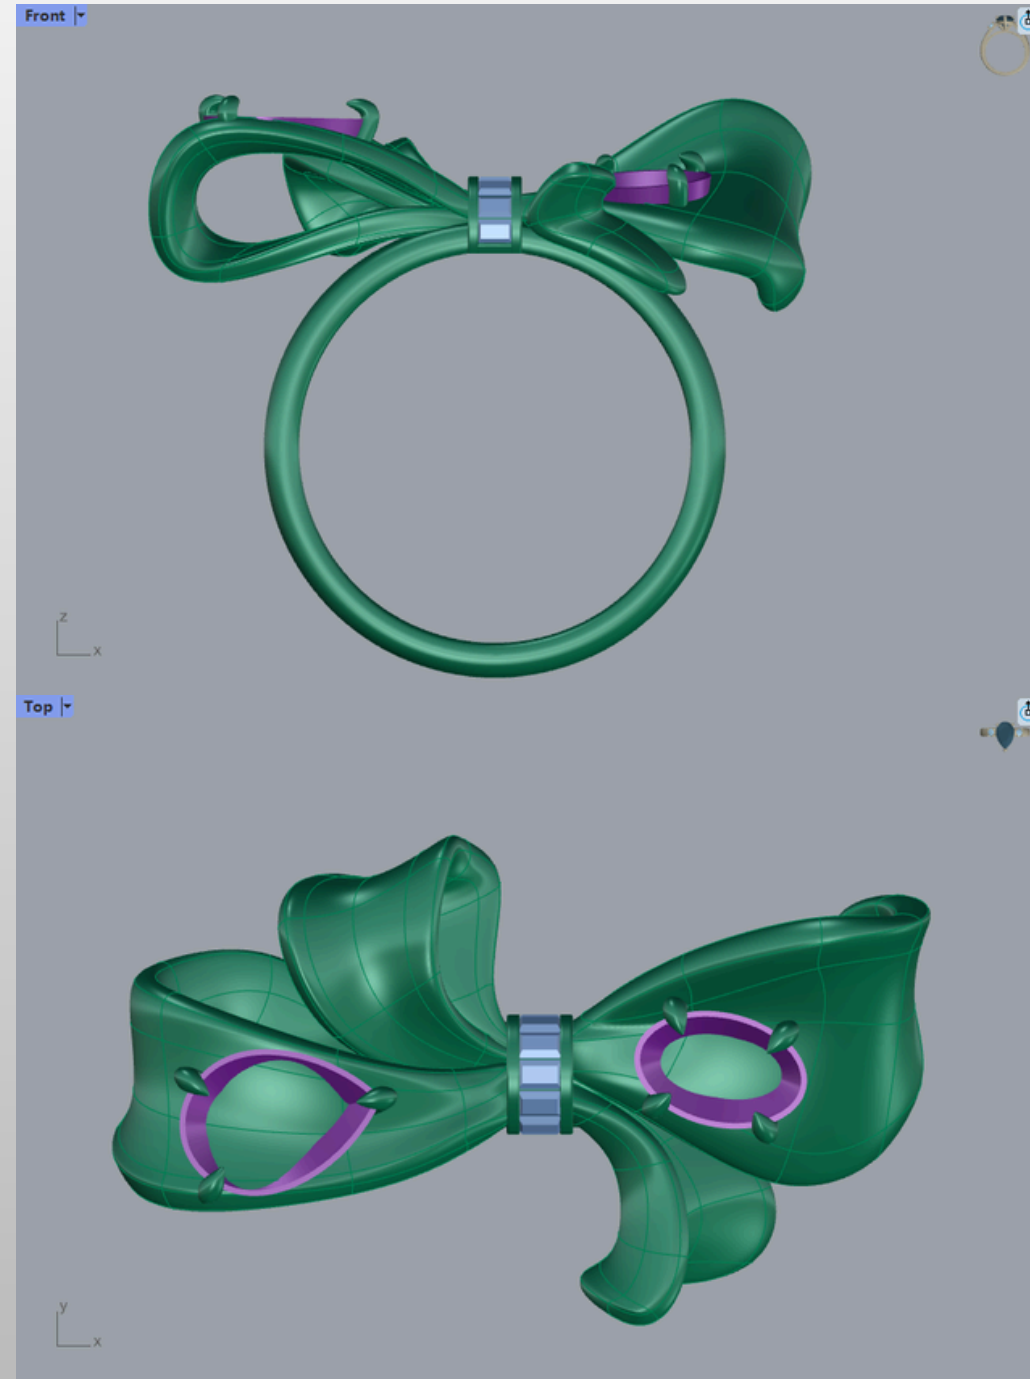

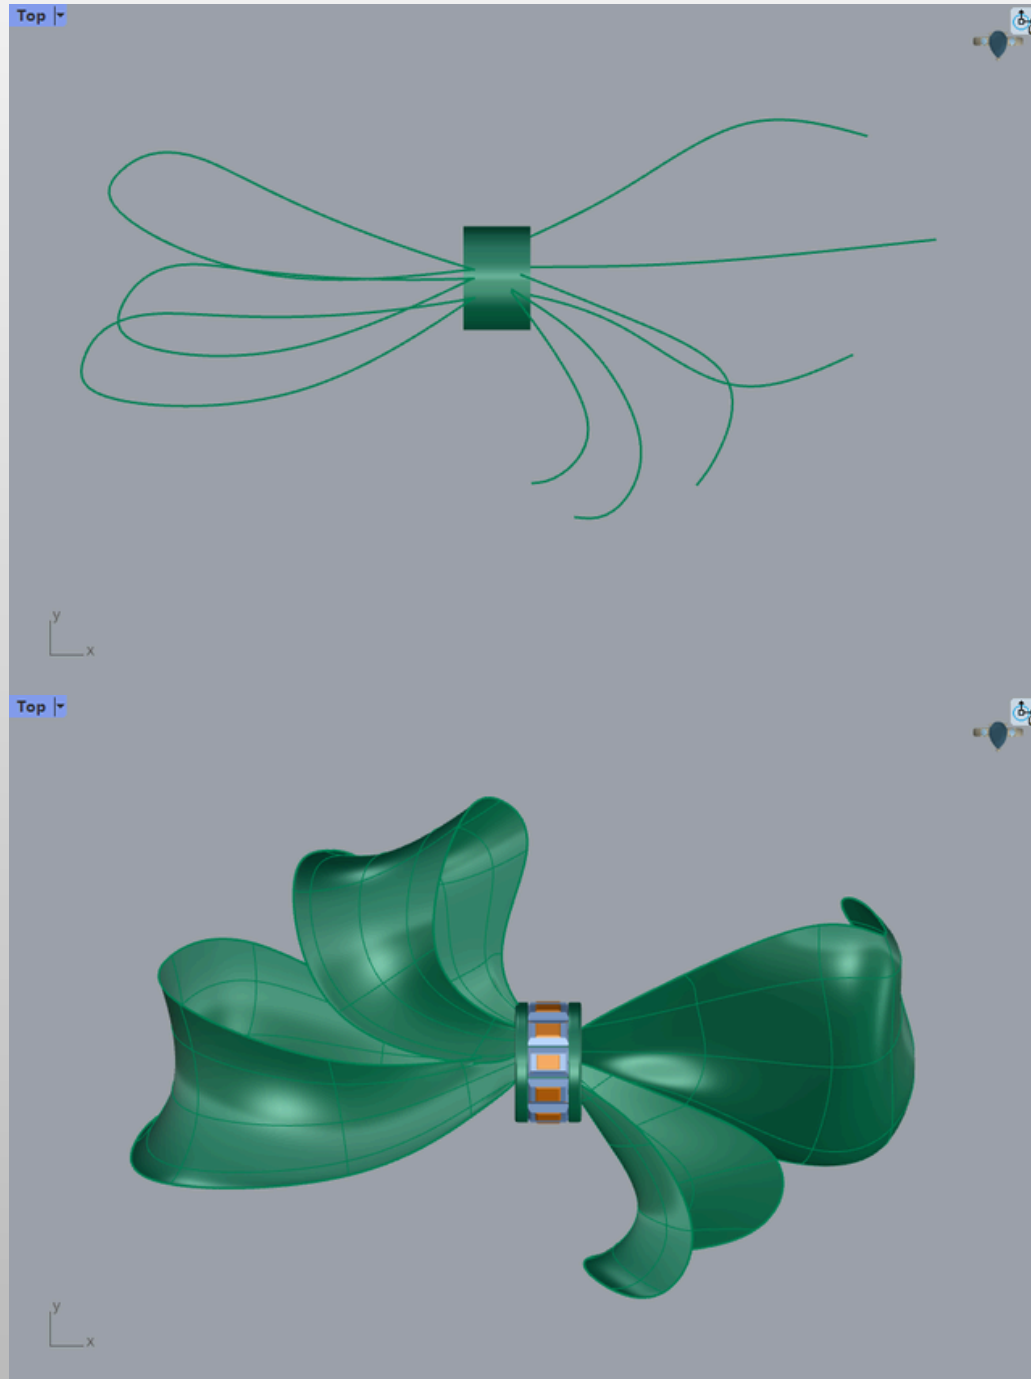

What makes it even more special is that the client herself exudes a soft and graceful aura, much like the lightness and elegance of a ribbon. The ring is not just a birthday gift, but an extension of her temperament and a reflection of her unique style.
