Power Strip

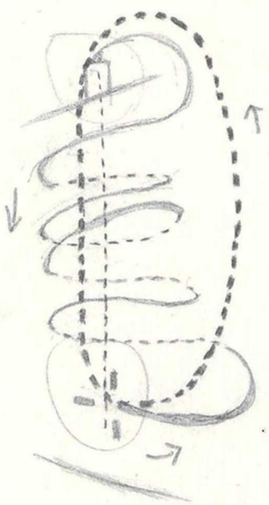

The plug is [redacted] used to take electricity, the socket is [redacted] used to receive electricity, and if the plug is in its own socket, no electricity will be generated. It's head is connected to it's tail in a form known as self-referencing in philosophy.

The ouroboros that swallows its own tail is a symbol of self-reference.

Research Sketch

When a person moves up or down in the system, they will find themselves back at the beginning point, this is the STRANGE LOOP.
«I Am a Strange loop»
by Douglas R Hofstadter

Experoments

FIGURE 22.
Experoments

Achieving three-dimensional draping and bodily freedom through a single piece of fabric.
The experiment commenced on a half-scale mannequin to explore overall proportions and structural logic, before refining details and dynamic fit adjustments on a full-scale mannequin.
